PLANNING ASSIGNMENT

Planning Assignment

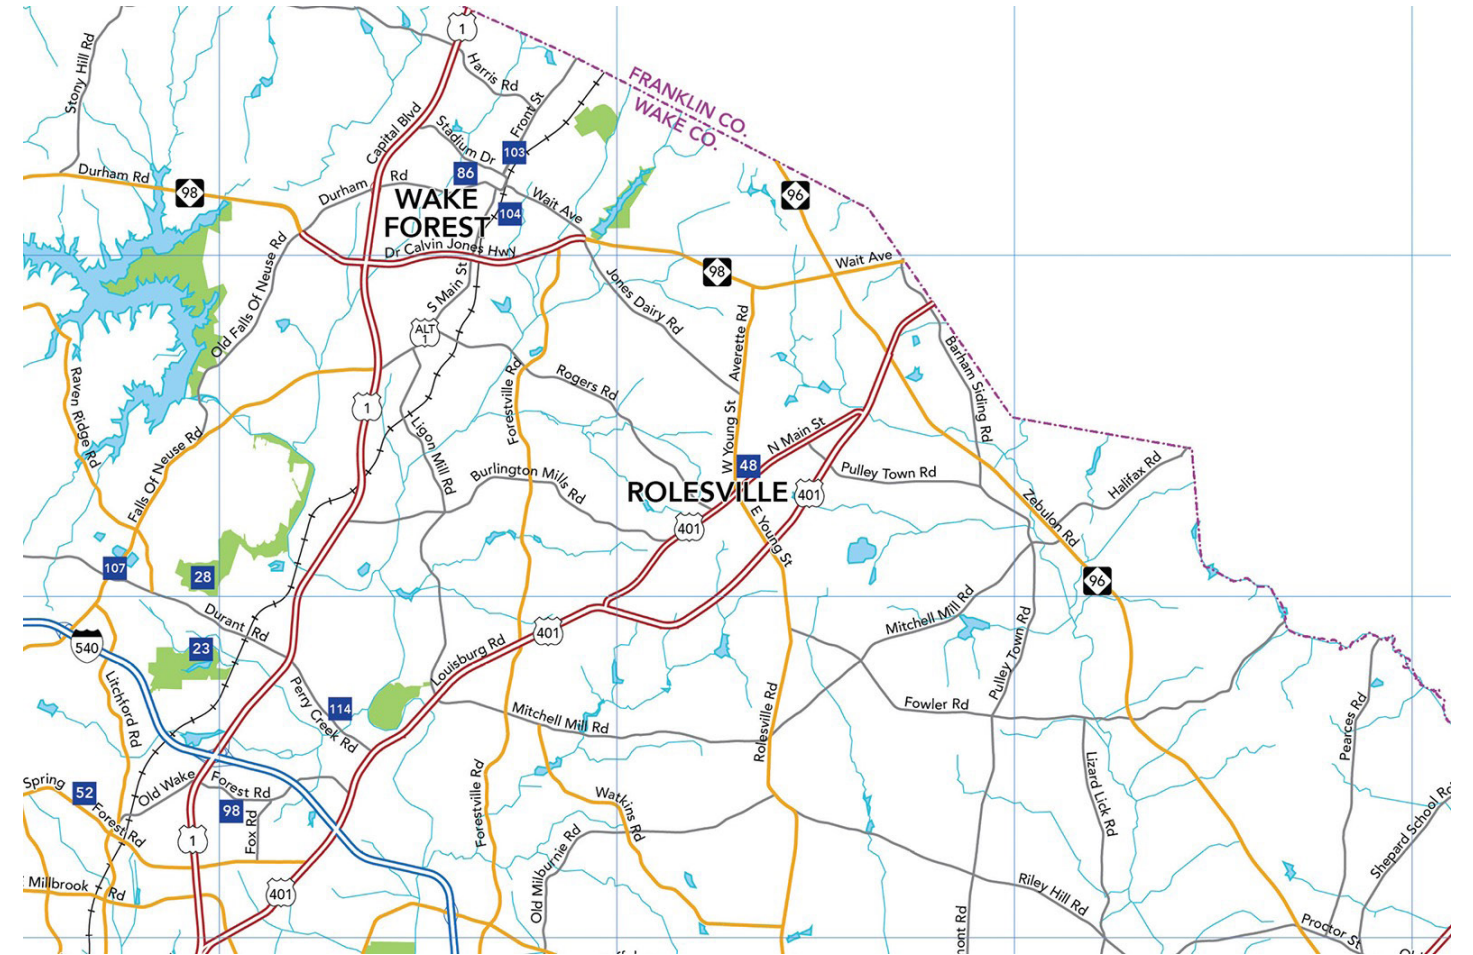

The Town of Rolesville has become the fastest growing community in the Triangle region and is experiencing accelerated growth in a county that is consistently one of the fastest growing counties in North Carolina. Rolesville is a community of approximately 10,000, situated in the greater Research Triangle Region adjacent to Raleigh and Wake Forest, with a population of over 22,000 within a three-mile radius.

Over the last several years, Rolesville's growth has primarily been Residential. Their current tax base ratio is 92% Residential and 8% Commercial. Rolesville realized they need to diversify their tax base and this current ratio was unsustainable. The Town's leaders identified the importance of targeting and reserving undeveloped land for non-residential use by preparing large tracts of land to attract non-residential development. The primary goal of the planning assignment is: **Grow Commercial and Industrial Uses in Rolesville.**

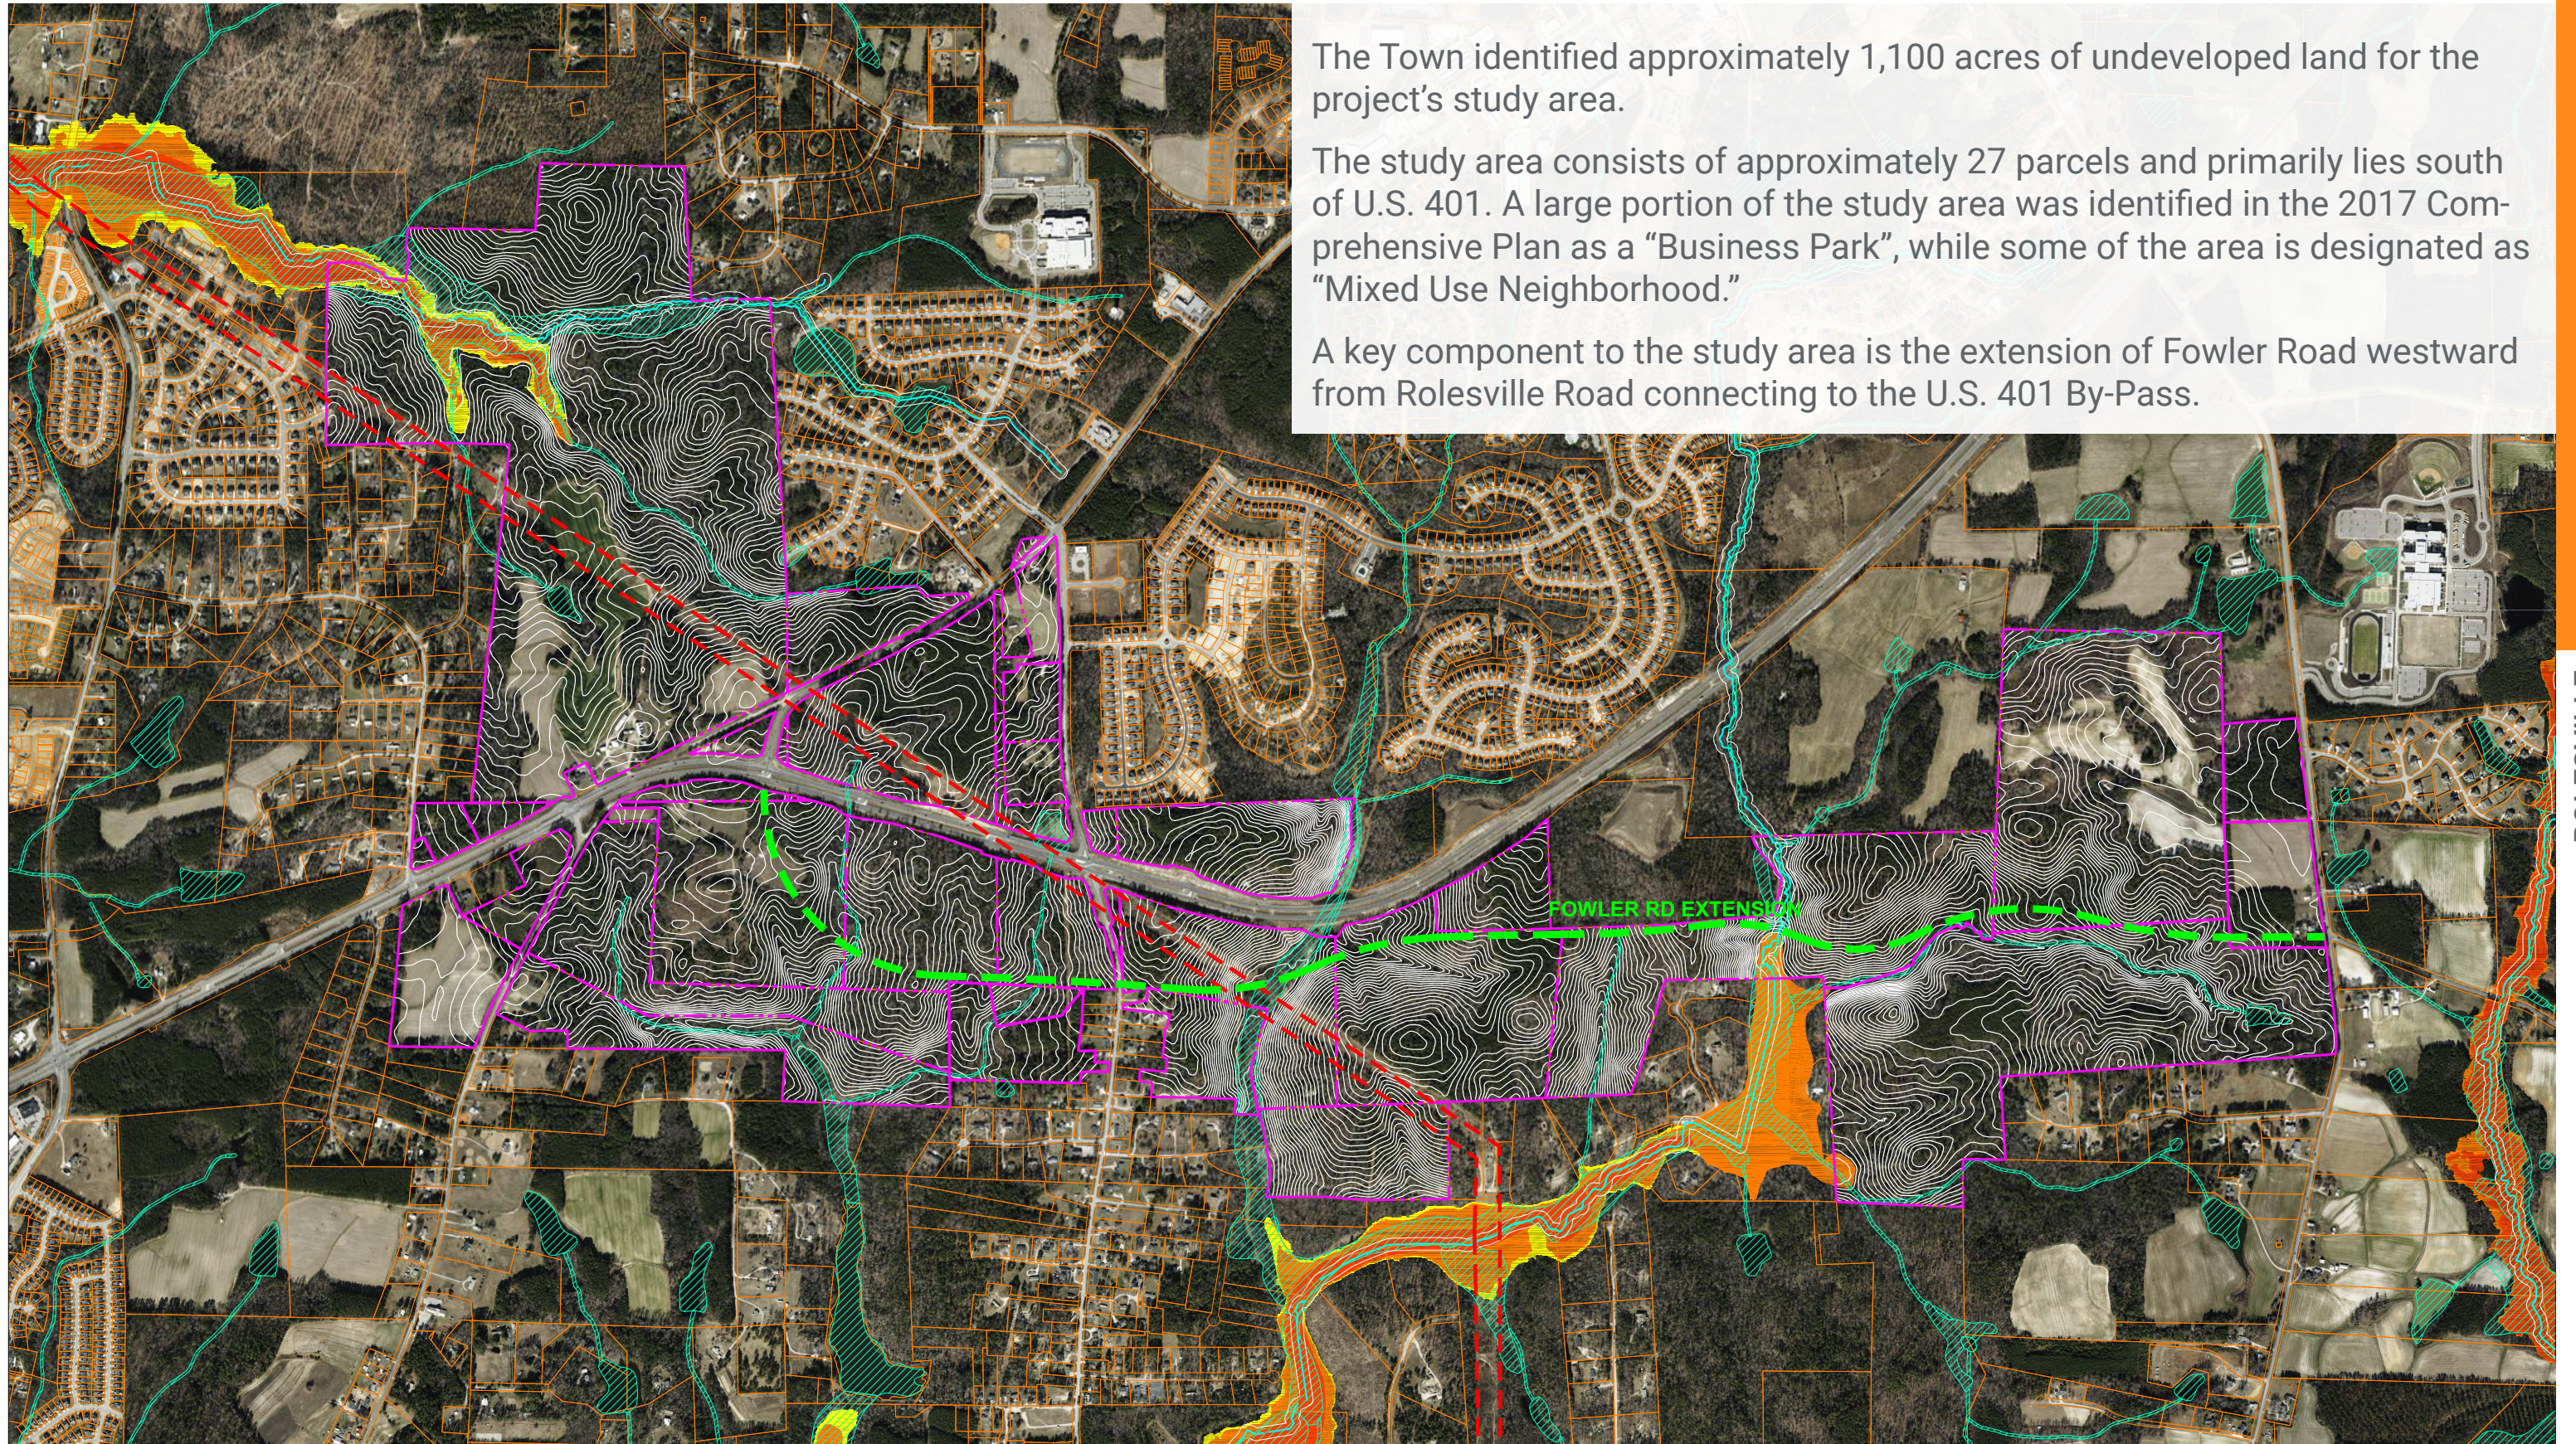

A secondary goal of the planning assignment was the Town's desire to create more job opportunities for current and future residents as the majority of the Town's residents work outside of town limits.

The assignment was organized into four basic parts:

1. **Market Analysis** of the area's ability to support Industrial and Commercial land uses.
2. **Site Analysis** of the property's natural features and status of utilities.
3. **Conceptual Master Plan** illustrating a long-term vision of growth.
4. **Action Plan** for initiating and sustaining the development of the master plan

Study Area

The Town identified approximately 1,100 acres of undeveloped land for the project's study area.

The study area consists of approximately 27 parcels and primarily lies south of U.S. 401. A large portion of the study area was identified in the 2017 Comprehensive Plan as a "Business Park", while some of the area is designated as "Mixed Use Neighborhood."

A key component to the study area is the extension of Fowler Road westward from Rolesville Road connecting to the U.S. 401 By-Pass.

02

MARKET ANALYSIS

MARKET ANALYSIS

BUSINESS SURVEY SUMMARY

RECOMMENDED TARGET SECTORS

NEXT STEPS

Market Analysis

Rolesville will be an attractive location to companies seeking skilled, educated, and talented people. Talent is driving business location decisions and talent is Rolesville's number one asset. The town has a fast-growing population of young, educated, and skilled people. They are attracted to Rolesville because it is more affordable than other towns in the Raleigh metro area, and it has quality schools. The development of the commercial growth corridor will provide space for technology and life sciences companies seeking to leverage local and regional talent.

Technology and life sciences companies will come to Rolesville because of the workforce; however, commercial businesses such as retail, restaurants, services, and entertainment will come because of the growing market. Rolesville grew an astounding 150% between 2010 and 2020, faster than neighboring towns. Retail leakage shows there is opportunity for more grocery and general retail. As Rolesville's population continues to grow, so will the commercial opportunities.

The commercial corridor development will provide space to attract new employers and business. It will reduce out-commuting of the workforce and keep more retail spending local. The development aligns with Rolesville's strategic plan. Goal 10 under "Mindful Growth" is to "create a diverse mix of commercial, industrial, and residential development." It also aligns with the 2018 Economic Development Strategic Plan, specifically the goal of "Build for the Future" and strategy to "designate targeted growth areas for economic development and incentives." The corridor is envisioned as a mix of commercial and industrial development with residential development adjacent. The development will provide important property tax revenue that supports further amenity and government services development.

In order to implement the vision, Rolesville will need to team with strategic partner Wake County Economic Development to market the business sites; engage with landowners to secure the property for mixed use development; invest in infrastructure and site development; and be patient as development of this magnitude takes time.

Market Assessment Highlights

- Fast growing population within a fast-growing metro area
- Young population and workforce
- High educational attainment, one-third have bachelor's degrees
- Higher per capita (\$39,915) and household incomes (\$101,829)
- Based on the average household income in Rolesville, housing is more affordable than the U.S. average and more affordable than in Wake County
- Business base is predominantly services and retail, and most residents work in services and retail
- Retail leakage shows opportunity in grocery, general merchandise
- Most spending potential in home furnishings, entertainment/recreation, personal care products and services, health care, apparel and services, food away from home, education, and food at home

Business Survey Summary

An online survey was used to gather information from businesses to inform the planning process of the commercial district. The survey asked questions about the business climate, future plans, resources needed, and the types of businesses that would complement and fill gaps in the current business mix. The Town of Rolesville sent the survey to a database of businesses. The survey was also sent to members of the Rolesville Chamber of Commerce and posted on the town's website and social media. There were 24 responses to the survey. Full survey results can be found in Appendix B.

The respondent profile is a small business owner with 65% reporting having five or less employees. Most are health care, financial services, and business and professional services businesses. The majority of respondents have owned or operated a business in Rolesville for more than six years.

**65% Have
<5 Employees**

For most respondents, their future plan is to stay in Rolesville and stay about the same size. Approximately 19% have plans to expand at a new location. Only about 5% plan to expand at their current location.

Approximately 27% of people located their business in Rolesville because they retired there. The same percentage are there because of location. Other location factors include quality of life, they have a home-based business, and they have a personal or hometown connection. Since most report personal reasons for locating a business in Rolesville, the town's marketing approach for small business should include personal stories and connections and quality of life messaging.

**57% Plan to Stay
in Rolesville as
Long as They Can**

Businesses are most satisfied with the school system, internet access, and utilities. They are least satisfied with available business locations, quality of life amenities, and local regulatory environment. The town should leverage the quality of the schools, internet service, and utilities in business attraction messages.

Respondents cite a wide range of drawbacks to operating a business in Rolesville including lack of space, low concentration of businesses, traffic, and access to labor. They also cite the pandemic and scaling up as challenges to growth. The work done to develop the commercial corridor will address two of the drawbacks by creating more space for business and developing a stronger business base.

When asked what kinds of businesses should be recruited to Rolesville, most cite retail, restaurants, and entertainment. This is reinforced by the retail leakage analysis.

**Want More Retail,
Restaurants,
Entertainment**

Businesses want to see Rolesville develop a commercial district, be more pro-business, and rebrand the town. Survey respondents are supportive of more business development. One respondent noted that "businesses pay most of the taxes that support the town, so the town should be more pro-business."

Recommended Target Sectors

Rolesville’s economic development opportunities are closely aligned with those of Wake County. Wake County Economic Development is the lead business recruitment organization for Wake County and its municipalities. Rolesville depends on the county’s external marketing program to generate leads for new business development. The town’s economic development strategic plan recommends “recruiting new 2nd stage or more mature companies in partnership with the Wake County Economic Development (WCED).”

Wake County’s economic development program targets life sciences, advanced manufacturing, IT and technology, and cleantech/smart grid sectors. The organization implements marketing campaigns, leads sales trips and trade missions, and participates in industry trade shows and conferences for these sectors.

Advanced Manufacturing - production activities that depend on information, automation, computation, software, sensing, and networking

IT & Technology - software and services, technology hardware and equipment, and semiconductors and semiconductor equipment

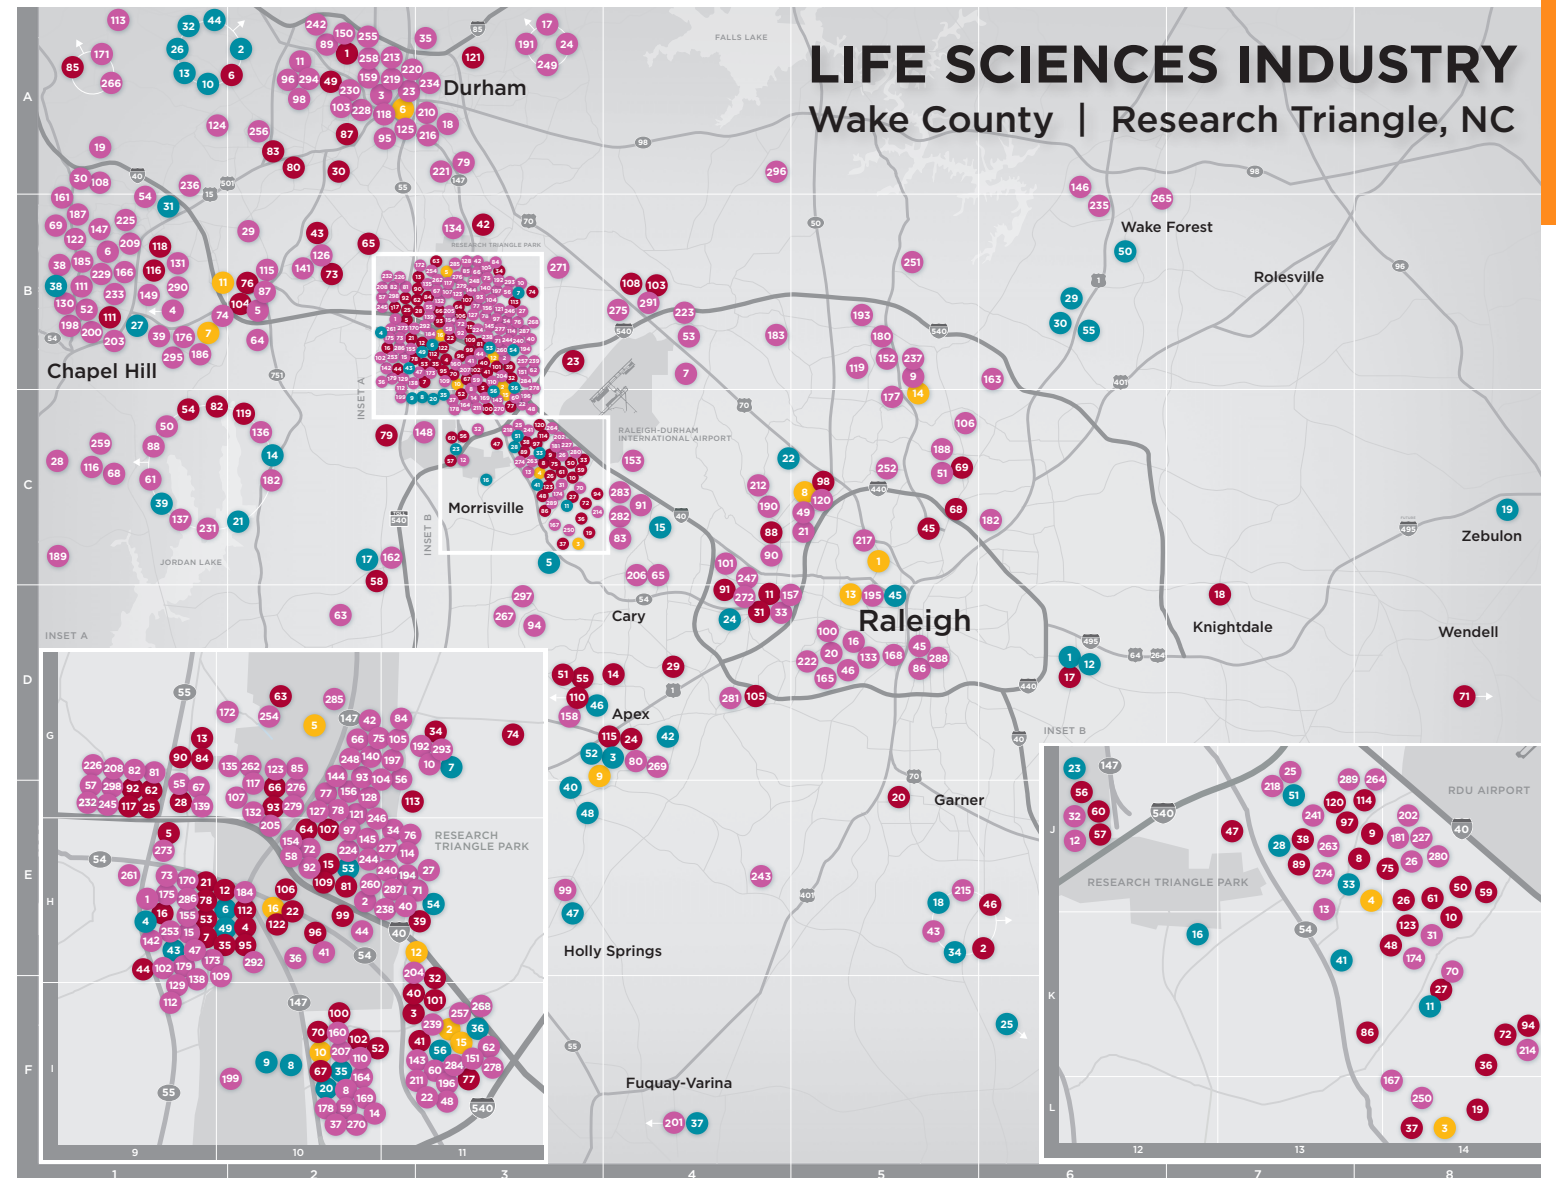

Cleantech/Smart Grid - companies that directly enable the efficient use of natural resources and reduce the ecological impact of production

Life Sciences - research, development and manufacturing of pharmaceuticals, biotechnology-based food and medicines, medical devices, biomedical technologies, nutraceuticals, cosmeceuticals, food processing, and other products

Based on Rolesville’s highly educated, professional workforce and the land development opportunities of the new commercial corridor, **we recommend Rolesville target IT & Technology and the Life Sciences sectors.** Land development opportunities emerging in the commercial corridor include space for class A business parks and sites that will have easy access to a highly skilled labor force. The other two sectors, Advanced Manufacturing and Cleantech/Smart Grid could also find Rolesville attractive; however, we believe the best opportunities lie in technology and life sciences.

Next Steps

The recommended next steps can be done in tandem. Development is not a linear process. It often takes twists and turns. Working on several steps at one time can advance the development process. A development of the magnitude of the commercial corridor will take years to realize. Get started by taking one step at a time.

Rolesville should continue landowner engagement to ensure the corridor remains available for mixed use development. The town may consider optioning key tracts best suited for a business park development. An option would provide a high level of control on development.

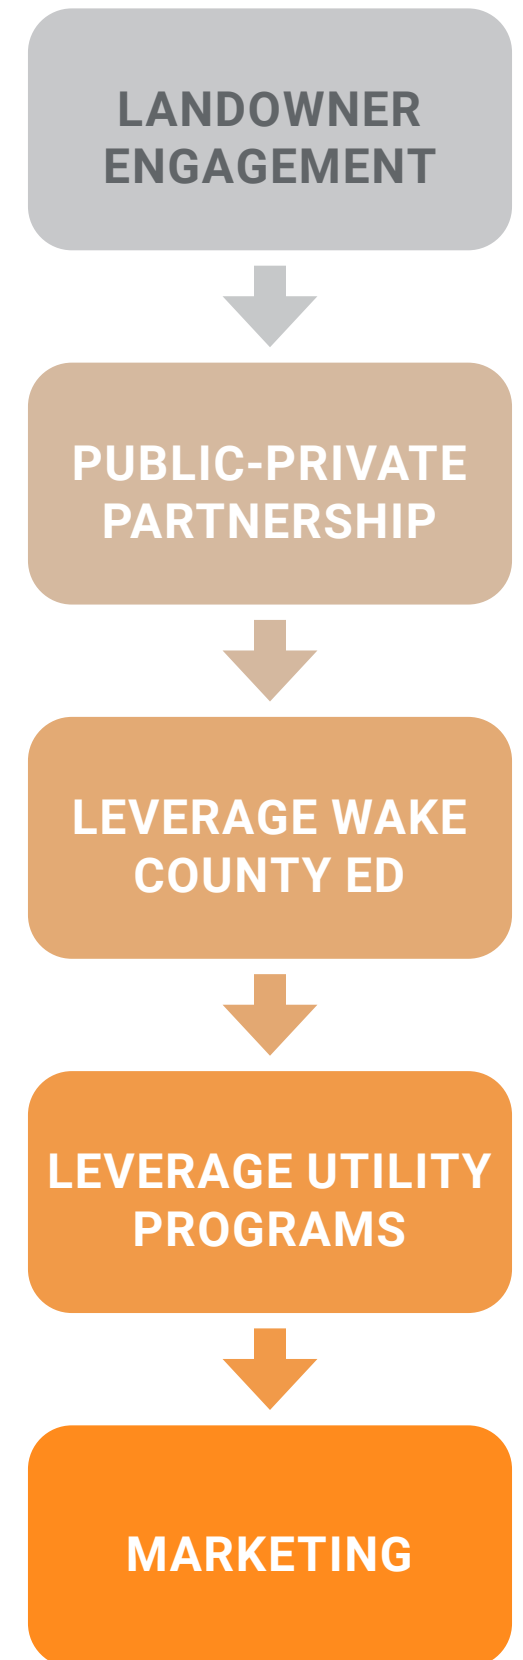

Seek private partners in the development. Public-private partnerships take many forms. Rolesville could fund due diligence and site certification as a loan to private landowners. The town could invest in site preparation to entice a speculative building by a private entity. A good example of a public-private partnership is in Catawba County where multiple spec buildings have been built through a city-county-developer partnership. In this partnership, the city and county waived some development fees, provided a grant equal to property taxes for up to three years, and paid electricity, insurance, and other carrying costs for up to three years. If the building sells within three years, the governments are repaid.

Keep Wake County Economic Development informed of the evolving development vision, available properties, and desire to site life sciences and technology companies. These economic development allies will help Rolesville communicate the opportunity to other strategic partners such as the Economic Development Partnership of NC.

Rolesville should leverage utility-sponsored site development programs. The Duke Energy Site Readiness Program provides assessments and evaluations to help a community better prepare a site. For coop-served properties, NC Electric Cooperatives recently launched a site certification program that sponsors due diligence on sites.

Rolesville can promote development opportunities in the corridor on its website and in social media. Be sure to make existing businesses aware of the sites as some may consider expanding into the corridor. Realtors are another group you will want to make aware of the development plan. Realtors can be allies in promoting the sites.

Beyond development steps, Rolesville can continue to improve business friendliness. Some best practices from other communities include annual business retention and expansion visits, business advisory council to provide input into town policies, business appreciation day/week of events, and regular e-communications on town updates and events.

Topography

Potable Water

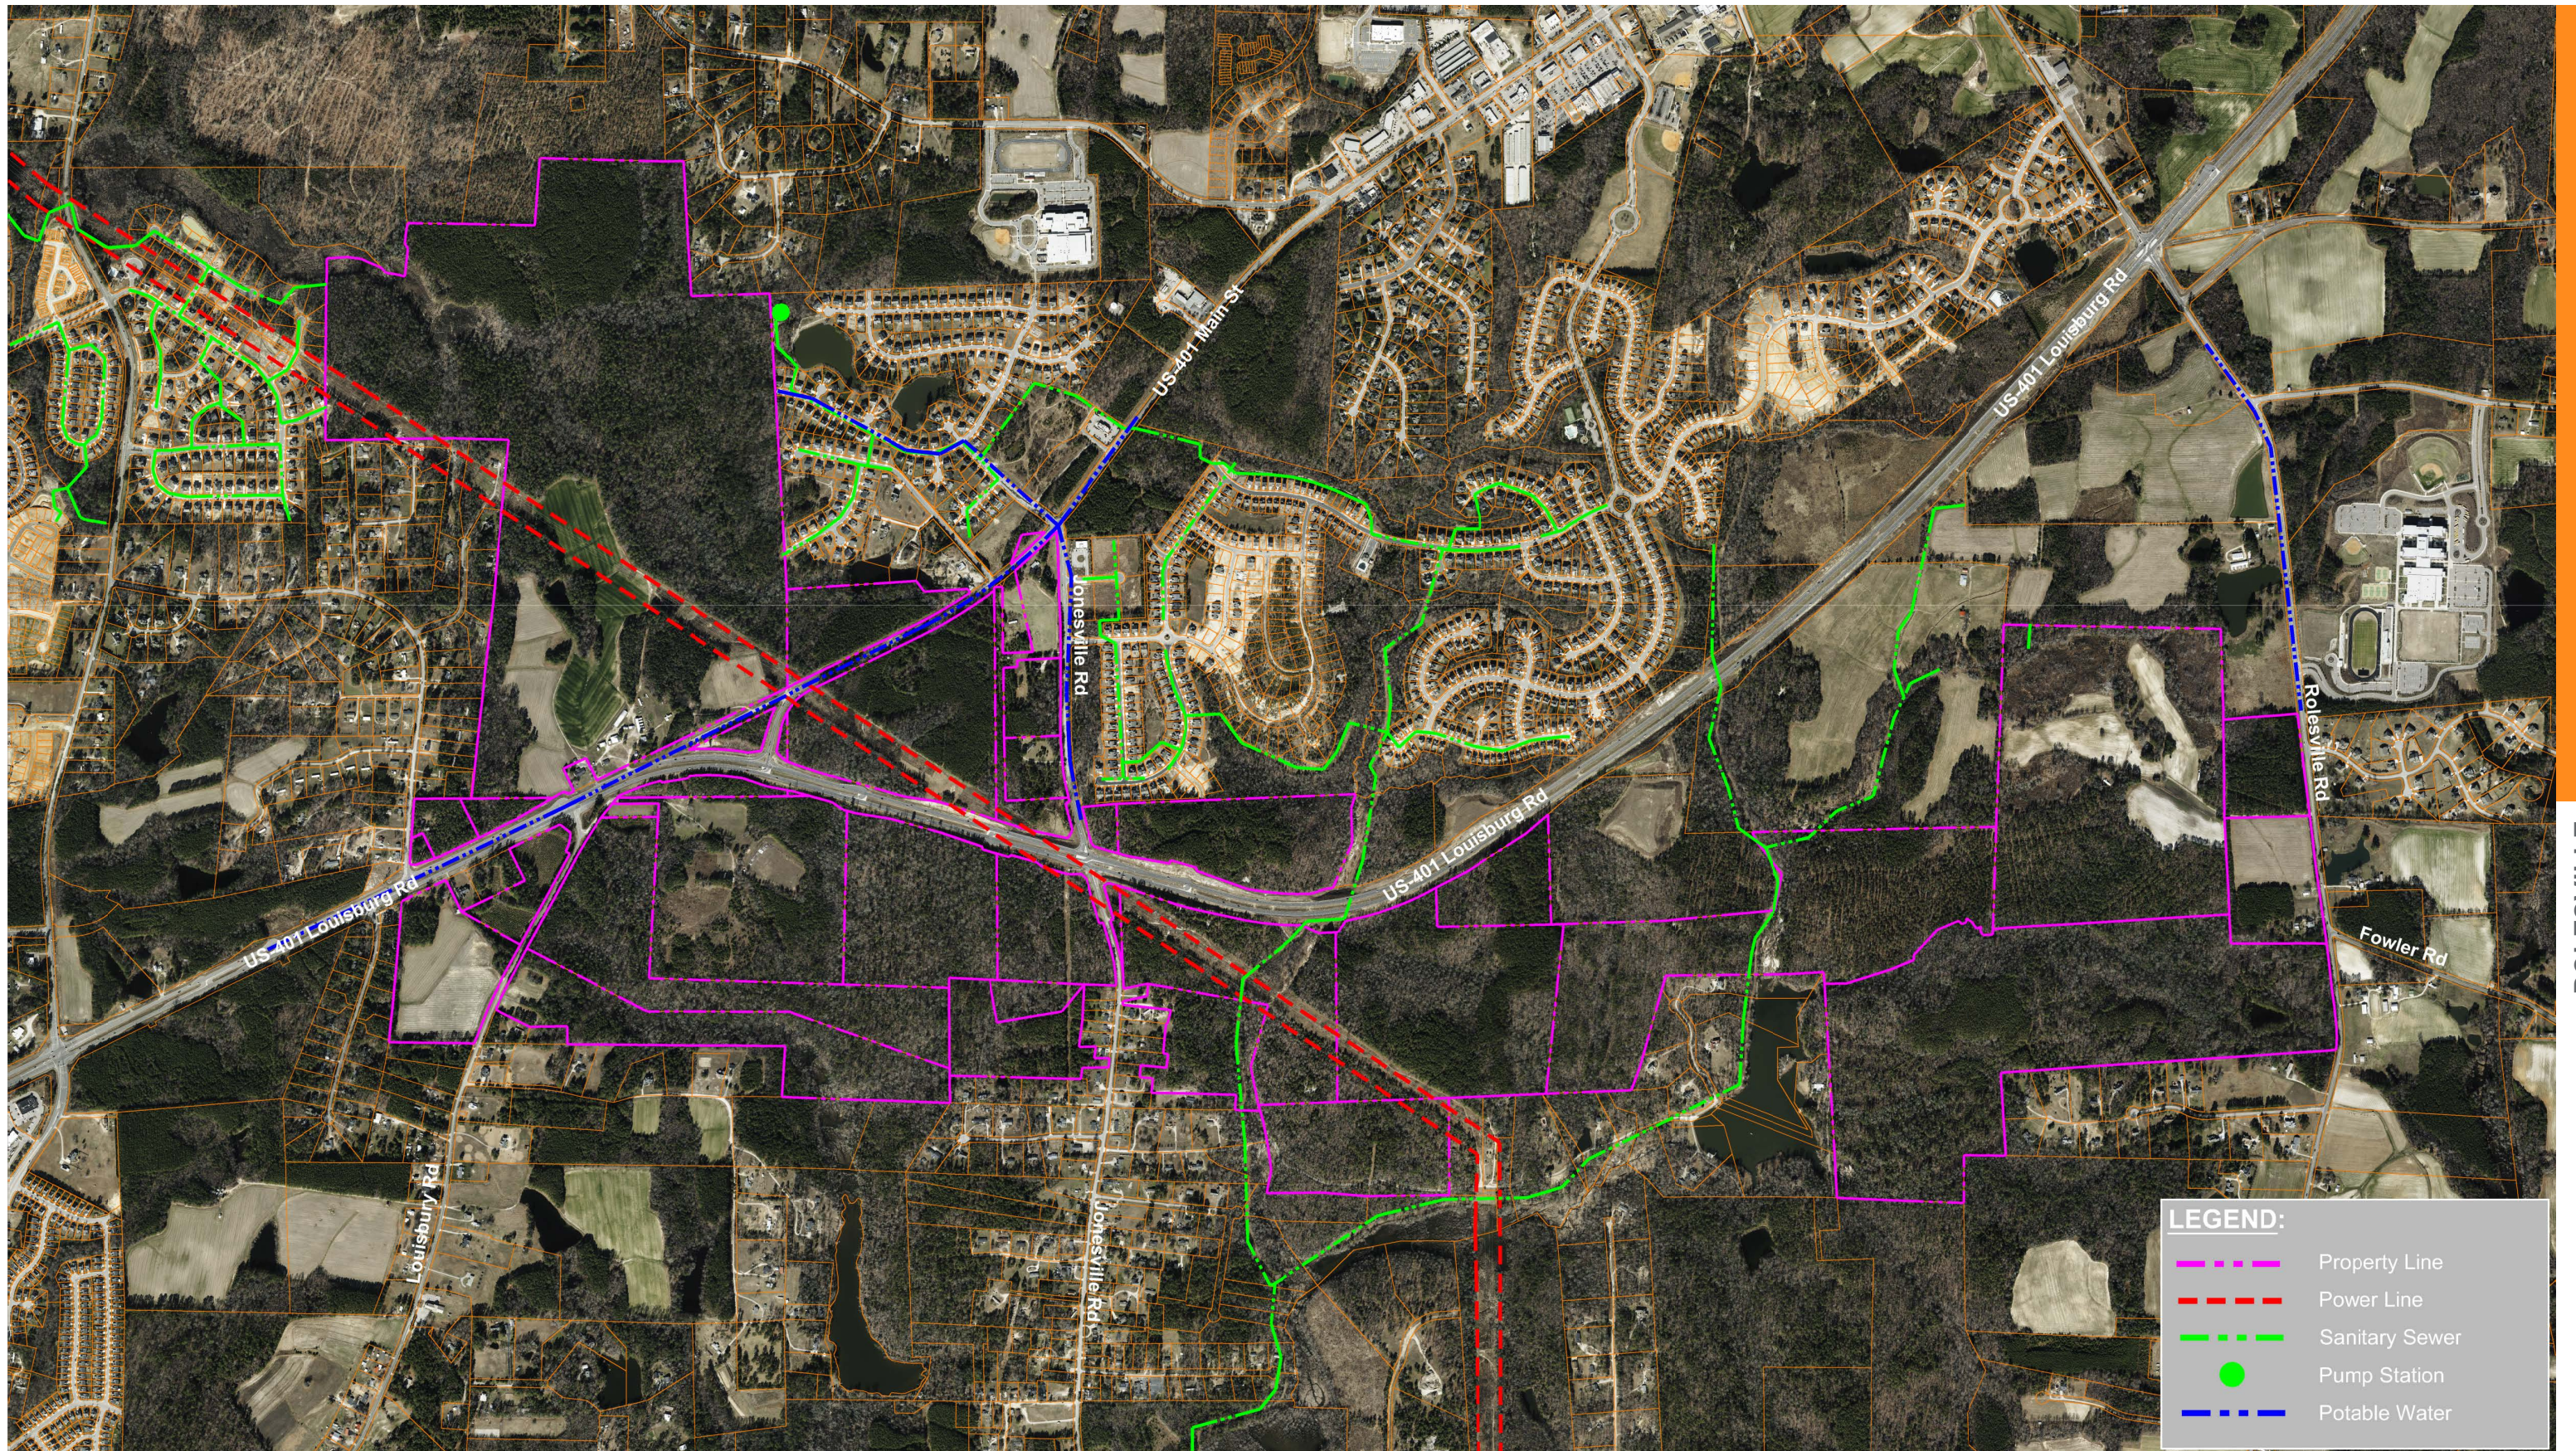

The potable water system which would serve the area included in the Feasibility Study is operated and maintained by the City of Raleigh. Currently there is an existing 16-inch Potable Water Main located in US Hwy 401 that extends from west to east. This existing main crosses through the proposed Feasibility Study Area. There is also an existing 12-inch Potable Water Main located in Forestville Road which is adjacent to the Feasibility Study Area. Finally, there is an existing 12-inch Potable Water Main located in E. Young Street that extends to the south of the high school and stops just short of the proposed Feasibility Study Area.

Water Main extensions to the proposed Feasibility Study Area will be extended from the existing mains identified above. All proposed water main extensions will be reviewed and permitted by the City of Raleigh and must be designed in accordance with their details and standard specifications. The water mains will be required to be placed in a public right-of-way; the City of Raleigh discourages the use of easements for water mains. All proposed potable water extensions will be constructed utilizing Ductile Iron Pipe with fire hydrants located as required by the City. All individual buildings will require individual water meters and backflow preventers.

Sanitary Sewer

The sanitary sewer system which would serve the area included in the Feasibility Study is operated and maintained by the City of Raleigh. Currently there is an existing 8-inch sanitary sewer located to the west of the Feasibility Study Area in the Drayton Reserve Subdivision. No elevations for the existing sanitary sewer were available but based on the existing topography, the Feasibility Study Area north of US Hwy 401 should be able to drain by gravity sewer to this existing system. There is another existing sanitary sewer outfall located to the east of the westernmost Feasibility Study Area in the Hampton Pointe Subdivision. However based on the existing topography, it does not appear that this system could be utilized. The City of Raleigh has a 15-inch sanitary sewer outfall that extends north parallel to Jonesville Road and crosses under US Hwy 401. The majority of the Feasibility Study Area would connect to this outfall. However based on topography, a pump station will be required to collect the wastewater from the study area and pump it to the sanitary sewer outfall. The pump station would be designed in accordance with the City of Raleigh specifications and will be owned and operated by the City. From the existing 15-inch sanitary sewer outfall, a 10-inch outfall extends to the northeast to Rolesville High School and would allow the remainder of the proposed Feasibility Study to connect. There is one small section within the Feasibility Study Area adjacent to Rolesville Road and south of the Fowler Road intersection that will require a small pump station to transport the collected wastewater to the gravity sewer outfall.

All proposed sanitary sewer extensions will be reviewed and permitted by the City of Raleigh and must be designed in accordance with their details and standard specifications. The minimum pipe size for a gravity sewer would be 8 inches and manholes will be required at every change in direction and at least every 400 LF. A combination of PVC and Ductile Iron Pipe would be utilized. Public Sanitary Sewer lines now located in a public right-of-way will require an easement. The depth of the proposed sanitary sewer will determine the size of the required easement.

#2021045

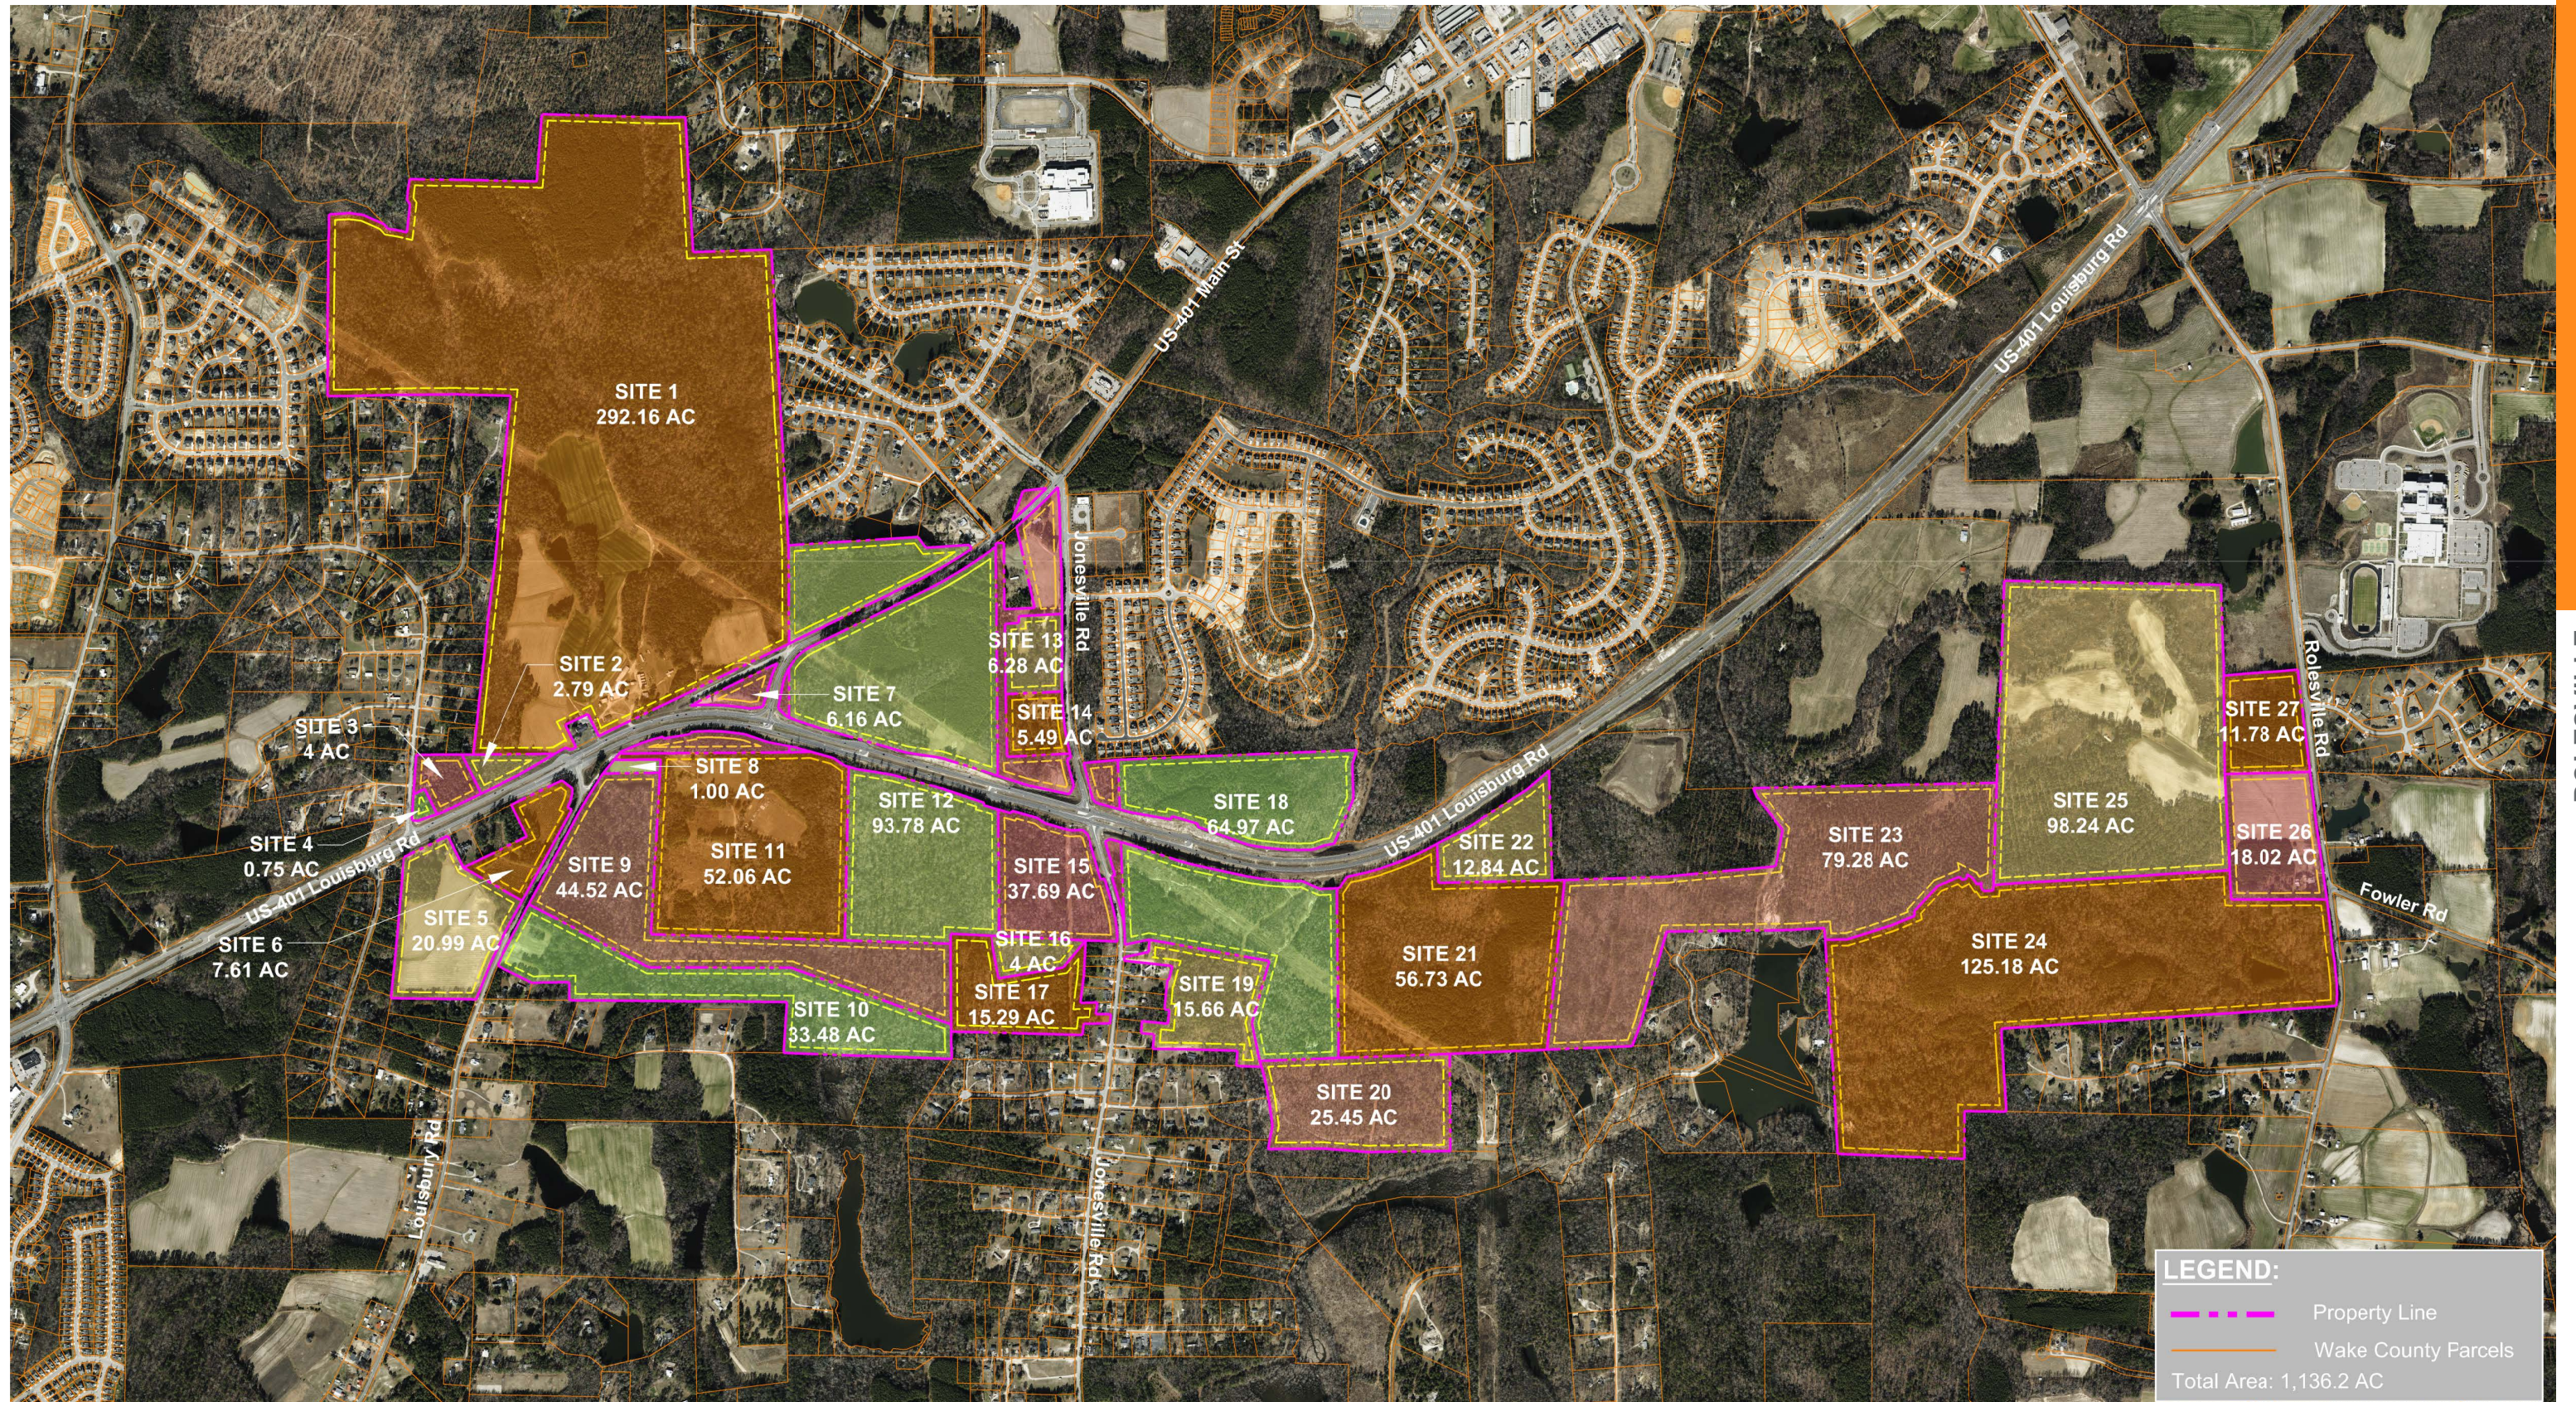

Each layer was analyzed and then overlaid upon one another to determine the buildable area of the study area. Steep slopes, environmentally sensitive areas, and protected areas such as wetlands and streams were withdrawn from consideration for development. The vast majority of the property is suitable for development and deemed 'buildable' for development.

04

LANDOWNER ENGAGEMENT

Early in the planning process, landowners in the study area were invited to an information session to orient them to planning study and its goals. Landowners were encouraged to keep in touch with the Town's economic development office. A follow up meeting with the landowners occurred at the completion of the project where they were shown the master plan concept.

INDUSTRIAL BUSINESS PARK

After careful examination of the analysis plans, and an understanding of the buildable area, a conceptual master plan has been created. This plan focuses on creating commercial and industrial land uses while also allowing for important activity zones to be prominent. This master plan brings forth one vision of possibilities for the land assemblage. It is quite natural for revisions to occur and alter the plan. Any number of revisions are reasonable as long as they do not stray too far from the primary goal of creating commercial and industrial land uses.

This planning conclusion is certain that the property examined and assembled by Rolesville is highly suitable for commercial and industrial growth.

NEXT STEPS - ACTIONS

PHYSICAL PLANNING

ECONOMIC DEVELOPMENT

LEADERSHIP

The Town has several 'fronts' to move on to bring the master plan to fruition. We have organized these into three categories: Leadership, Physical Planning and Economic Development. The steps laid out below are not meant to be sequential but worked on simultaneously and in tandem with one another.

Physical Planning

- Update Future Land Use Map to reflect the Commercial Growth Feasibility Study area
- Prepare preliminary Traffic Impact Analysis (TIA) of the study area
- Prepare an Infrastructure Plan for key utilities – Water and Sewer
- Prepare a Phasing Strategy Plan
- Rough Order of Magnitude (ROM) cost estimates for implementation

Economic Development

- Prioritize sites for certification based on costs and Return On Investment
- Meet with key landowners to secure sales commitment and price
- Identify partners and funding sources for site certifications
- Initiate the site certification process for key tracts
- Consider a not-for-profit entity to help option sites if needed
- Craft an incentives package based on quality of jobs and investments
- Develop an accelerated schedule for rezoning and permitting
- Work with Wake County Economic Development on joint marketing efforts
- Prepare preliminary conceptual site plan option for prospects as they come forward

Leadership

- Stay goal focused – Grow Commercial and Industrial Uses in Rolesville
- Consistent messaging - Everyone on the same page
- Keep Town Commissioners informed - Use closed sessions and retreats to strategize
- Stay close to the key landowners of large properties
- Work closely with Wake County Economic Development
- Resist & discourage residential land use proposals – update Future Land Use Plan
- Certify large key sites
- Be Patient – stay focused on the goal

- Food at Home

ESRI Lifestyle Tapestries

Lifestyle Categories

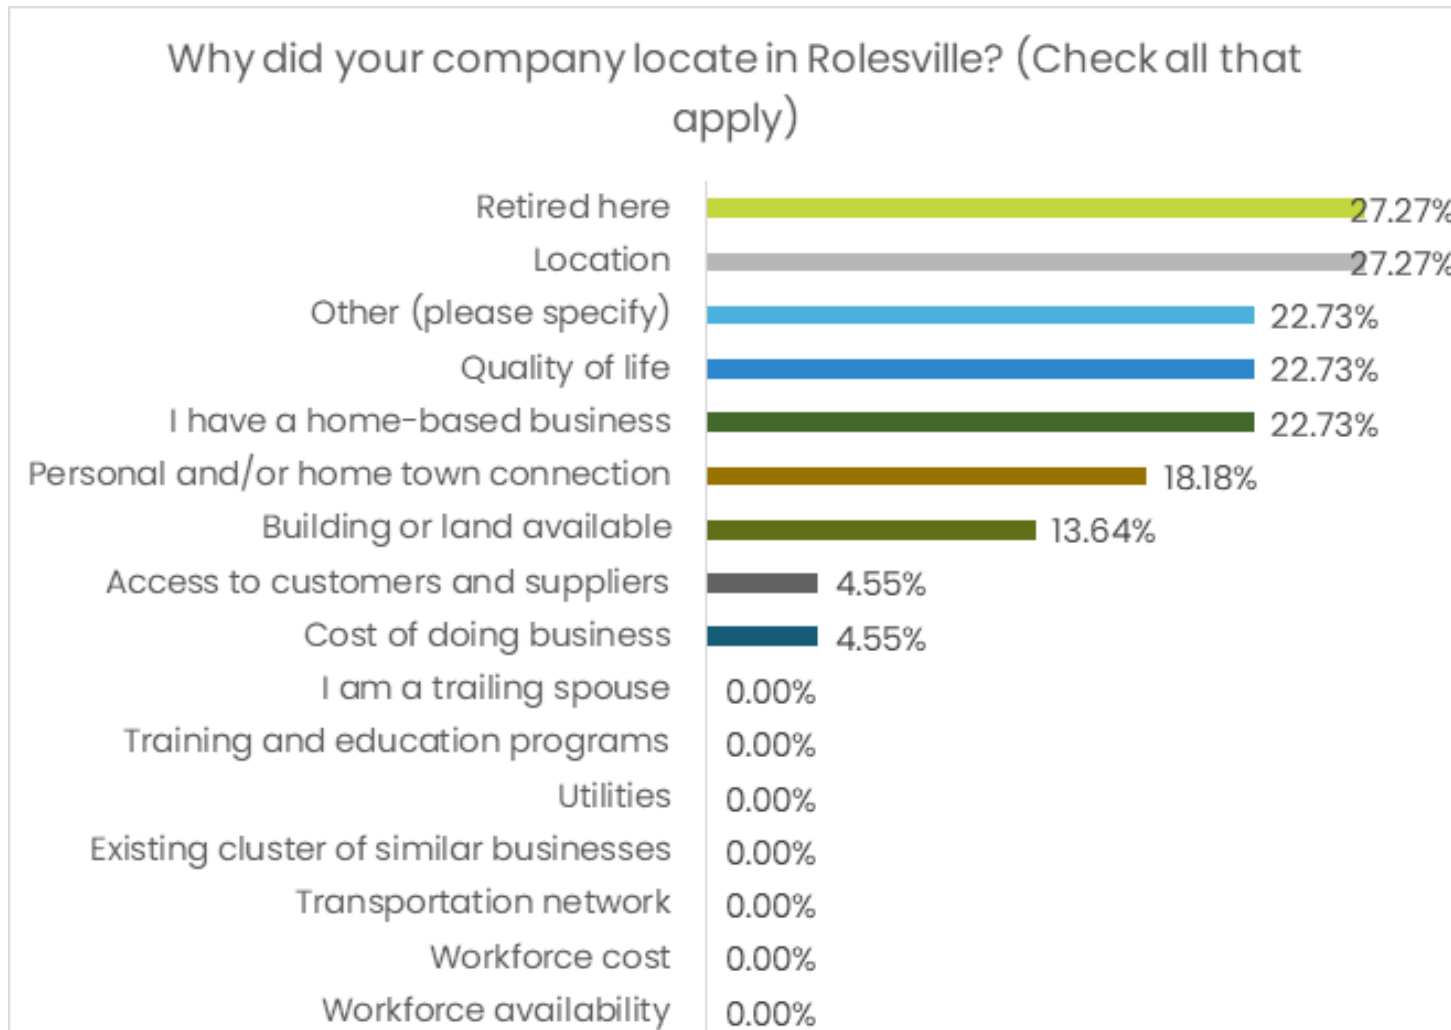

Family Landscapes-Workday Drive - Workday Drive is an affluent, family-oriented market with a country flavor. Residents are partial to new housing away from the bustle of the city but close enough to commute to professional job centers. Life in this suburban wilderness offsets the hectic pace of two working parents with growing children. They favor time-saving devices, like banking online or housekeeping services, and family-oriented pursuits.

Cozy Country Living-Green Acres - The Green Acres lifestyle features country living and self-reliance. Avid do-it-yourselfers, they maintain and remodel their homes, with all the necessary power tools to accomplish the jobs. Gardening, especially growing vegetables, is a priority, again with the right tools, tillers, tractors, and riding mowers. Outdoor living features a variety of sports: hunting and fishing, motorcycling, hiking and camping, and even golf.

Appendix B

Business Survey Results

The Town of Rolesville sent an online survey to a database of businesses. The survey was also sent to members of the Rolesville Chamber of Commerce and posted on the town's website and social media. There were 24 responses to the survey. The respondent profile is a small business owner in health care, financial activities, and business and professional services. The majority of respondents have owned a business in Rolesville for more than six years and plan to stay here. Most respondents do not have immediate growth plans.

Other (please specify)

- That's where I was appointed
- Small town feel no traffic or public transportation
- Opportunity to be part of growth at an early stage
- Commerce and education opportunities
- Rogers and Mitchell families located here in the 1700's.

What makes Rolesville attractive to business?

Centralized location to my clients
Right now, only houses and demographics
The amount of growth expected
Central to a large population base
Right now, I would say Rolesville is not very attractive to business. The town is small, there are precious few amenities, and the "Town" has not been very user friendly. We are here because of the potential opportunities that will become apparent as Rolesville grows.
No public transit
Growing population
Opportunity to be a rapidly growing area in the early stages
It depends on the business. The location of being neighbors with Wake Forest and Raleigh help with buying power, a necessity with small businesses in a small town.
Small town feel with close access to a variety of businesses.
Growing community.
Growing community
Proximity to large local population, transportation corridors, and reasonable taxes and laws.
Not certain. MH&C has been in business since January 1973; we knew all of our customers then, and we were and are trusted.
Small town atmosphere
Simplicity of life
Small town. Not crowded
Close to everything
Nice town
It's not.
Small town feel and we are the only business of our type here
Families with children support my business
Small business atmosphere

What is biggest hurdle operating in Rolesville?

Finding a location for needed expansion
Not many other businesses. Still somewhat sleepy.
Rolesville Residents do not support Rolesville Businesses
There really are none
The amount of time it takes to get things approved by the Town.
Too many apartment buildings
Lack of nightlife
Watershed and overcoming negative stigma about Rolesville around wake county
Not sure, I don't have any hurdles. Perhaps the cost of sq ft for a brick-and-mortar store front compared to sales. We tend to be a service industry town.
Rising property taxes.
Supplies
Access to highly skilled labor; need for local road improvements; and clientele diversity.
Little known area
Not enough commercial establishments
Traffic
Distance to airport
Downtown area's traffic is one way each direction.
Getting my business name out to clients
Underground rock.
Not enough businesses or restaurants

What type of business(es) should be recruited to Rolesville? Think of businesses that complement yours, would fill a market gap, etc.
Retail and restaurants
Restaurants, bars, boutique hotel, youth sports facilities, kids play areas or gyms,
Locally owned restaurants and grocery stores
Entertainment / performance space; movie theater
Restaurants, restaurants, restaurants. If you want to attract consumers, we need restaurants.
Pharmaceutical
Skating rink, place to have cocktails
Restaurants, retail shopping, entertainment / lifestyle places for kids and adults
I'm not sure, however, we have had small businesses come and go because of the lack of buying power (population) to sustain a retail business. The only ones to be able to do that are franchise businesses because of their advertising reach.
Commercial shopping and restaurants.
Restaurants
Dry good stores and full-service restaurants
Higher end grocery and natural food stores (like Trader Joe's or Whole Foods), diverse restaurants (Greek, Thai, Indian, Mediterranean), indoor recreation (trampolines, rock climbing, golf and batting cages, pickle ball courts)
Nice restaurant! No more fast-food eateries.
Restaurants (not fast food)
Costco, upscale restaurants, desert shoppes
Keep it limited but up scale. Doesn't need to be another Wake Forest, Holly springs or Cary.
A German restaurant
We need "sit down" restaurants and more than one grocery store.
Retailers restaurants contractors

- ### What can Rolesville do to better support your businesses?
- Develop commercial business part
 - Keep growing, don't listen to the naysayers
 - Show the residents the lack of support they give to local businesses
 - Businesses can pay most of the taxes that support the town. So, the town should be more pro-business.
 - Make it safe, becoming too urban
 - Work on RE-Branding - most people I talk to don't know what a great place Rolesville is - they have no clue how high our median income is - make in town homeowners attend Rolesville schools (Stonewater, Perry Farms etc.) - Heritage is a great example of how marketing has really grown an area (people want to attend the schools, people want to live there, businesses want a Heritage location etc.)- Rolesville needs an awesome PR to draw widespread attention to what all of us insiders already know!
 - Bring more retail spaces in.
 - Continue to evolve in a manner that offers diversity and incentives for large and small businesses. This includes roads, schools, recreation, and attractive downtown area.
 - Better working relationship with the Rolesville Chamber of Commerce
 - Local marketing
 - Quit bringing in a ton of other businesses. People want the low key, small town, local feel
 - Continue to provide me the right for my members to park on the street along Granite Falls Blvd

How satisfied are you with the following in Rolesville?

What business sector most closely matches your business or the business you work for?

- Other (please specify)**
- Service & distribution
 - Real estate
 - Commercial lawn maintenance.
 - real estate
 - Natural health
 - Health & swim club
 - Advertising

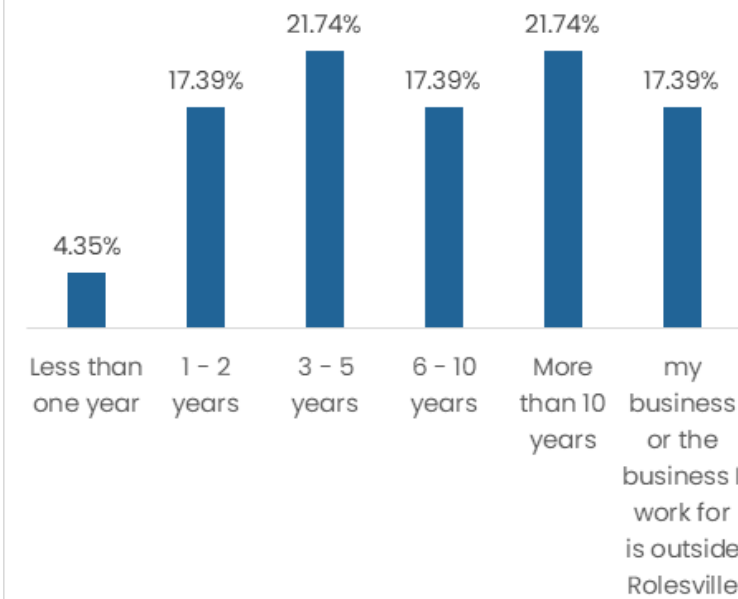

Have you heard about the Main Street and Burlington Mills Road Grant Project?

I... (check all that apply)

How many years has your business or the business you work for been in operation in Rolesville?

How many employees, full-time equivalents, are employed in your business?

Please share any additional information that will aid Rolesville's planning efforts. Thank you!

All types of businesses are important to community growth
Rolesville residents do not support Rolesville businesses because they don't want the growth or change. The newer residential housing we build the better it will be for current and new businesses.
We are in Rolesville because it is our home. We opened our business to be on the ground floor as Rolesville grows and develops. We believe we can contribute to this growth and development. We just encourage the Town to be open to helping businesses thrive-to be an asset, not a liability. Thank you.
Continue to grow
Keep the trees as much as possible, or replant wherever possible.
Continue to evolve Rolesville into a town that embraces positive change while learning from mistakes made by other small towns (thinking environment, pollution, and compromising our future for more immediate gratification).
Too many residential houses!
Please don't over build. The allure of Rolesville isn't because it is like every other town around Raleigh. It's because it is small and quaint. Growth should be very selective and minimal. Make it different than every other Raleigh suburb. Small but beautiful. Not overcrowded and the same as everywhere else. Less is more.
Looking for affordable leasing
Work to attract more industry.

Data Note: Household population includes persons not residing in group quarters. Average Household Size is the household population divided by total households. Persons in families include the householder and persons related to the householder by birth, marriage, or adoption. Per Capita Income represents the income received by all persons aged 15 years and over divided by the total population.

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2018 and 2019 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Data Note: Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. Supply and demand estimates are in current dollars. The Leakage/Surplus Factor presents a snapshot of retail opportunity. This is a measure of the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents 'leakage' of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. Esri uses the North American Industry Classification System (NAICS) to classify businesses by their primary type of economic activity. Retail establishments are classified into 27 industry groups in the Retail Trade sector, as well as four industry groups within the Food Services & Drinking Establishments subsector. For more information on the Retail MarketPlace data, please click the link below to view the Methodology Statement.

Tapestry Segmentation

Tapestry Segmentation represents the latest generation of market segmentation systems that began over 30 years ago. The 68-segment Tapestry Segmentation system classifies U.S. neighborhoods based on their socioeconomic and demographic composition. Each segment is identified by its two-digit Segment Code. Match the two-digit segment labels on the map to the list below. Click each segment below for a detailed description.

- Segment 1A (Top Tier)
- Segment 1B (Professional Pride)
- Segment 1C (Boomburbs)
- Segment 1D (Savvy Suburbanites)
- Segment 1E (Exurbanites)
- Segment 2A (Urban Chic)
- Segment 2B (Pleasantville)
- Segment 2C (Pacific Heights)
- Segment 2D (Enterprising Professionals)
- Segment 3A (Laptops and Lattes)
- Segment 3B (Metro Renters)
- Segment 3C (Trendsetters)
- Segment 4A (Workday Drive)
- Segment 4B (Home Improvement)
- Segment 4C (Middleburg)
- Segment 5A (Comfortable Empty Nesters)
- Segment 5B (In Style)
- Segment 5C (Parks and Rec)
- Segment 5D (Rustbelt Traditions)
- Segment 5E (Midlife Constants)
- Segment 6A (Green Acres)
- Segment 6B (Salt of the Earth)
- Segment 6C (The Great Outdoors)
- Segment 6D (Prairie Living)
- Segment 6E (Rural Resort Dwellers)
- Segment 6F (Heartland Communities)
- Segment 7A (Up and Coming Families)
- Segment 7B (Urban Villages)
- Segment 7C (Urban Edge Families)
- Segment 7D (Forging Opportunity)
- Segment 7E (Farm to Table)
- Segment 7F (Southwestern Families)
- Segment 8A (City Lights)
- Segment 8B (Emerald City)
- Segment 8C (Bright Young Professionals)
- Segment 8D (Downtown Melting Pot)
- Segment 8E (Front Porches)
- Segment 8F (Old and Newcomers)
- Segment 8G (Hometown Heritage)
- Segment 9A (Silver & Gold)
- Segment 9B (Golden Years)
- Segment 9C (The Elders)
- Segment 9D (Senior Escapes)
- Segment 9E (Retirement Communities)
- Segment 9F (Social Security Set)
- Segment 10A (Southern Satellites)
- Segment 10B (Rooted Rural)
- Segment 10C (Economic BedRock)
- Segment 10D (Down the Road)
- Segment 10E (Rural Bypasses)
- Segment 11A (City Strivers)
- Segment 11B (Young and Restless)
- Segment 11C (Metro Fusion)

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Spending Potential Index	116	131	120

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2018 and 2019 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Restaurants/Other Eating Places	7225	\$5,182,111	\$4,720,585	\$461,526	4.7	8

Data Note: Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. Supply and demand estimates are in current dollars. The Leakage/Surplus Factor presents a snapshot of retail opportunity. This is a measure of the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents 'leakage' of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. Esri uses the North American Industry Classification System (NAICS) to classify businesses by their primary type of economic activity. Retail establishments are classified into 27 industry groups in the Retail Trade sector, as well as four industry groups within the Food Services & Drinking Establishments subsector. For more information on the Retail MarketPlace data, please click the link below to view the Methodology Statement.

Special Food Services	7223	\$330,630	\$0	\$330,630	100.0	0
Drinking Places - Alcoholic Beverages	7224	\$2,541,817	\$0	\$2,541,817	100.0	0
Restaurants/Other Eating Places	7225	\$32,503,860	\$11,601,197	\$20,902,663	47.4	20

Data Note: Supply (retail sales) estimates sales to consumers by establishments. Sales to businesses are excluded. Demand (retail potential) estimates the expected amount spent by consumers at retail establishments. Supply and demand estimates are in current dollars. The Leakage/Surplus Factor presents a snapshot of retail opportunity. This is a measure of the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents 'leakage' of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area. The Retail Gap represents the difference between Retail Potential and Retail Sales. Esri uses the North American Industry Classification System (NAICS) to classify businesses by their primary type of economic activity. Retail establishments are classified into 27 industry groups in the Retail Trade sector, as well as four industry groups within the Food Services & Drinking Establishments subsector. Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2018 and 2019 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Population Inside Urbanized Area	0.0%
Population Inside Urbanized Cluster	94.3%
Rural Population	5.7%

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

Data Note: Consumer spending shows the amount spent on a variety of goods and services by households that reside in the area. Expenditures are shown by broad budget categories that are not mutually exclusive. Consumer spending does not equal business revenue. Total and Average Amount Spent Per Household represent annual figures. The Spending Potential Index represents the amount spent in the area relative to a national average of 100.

Source: Consumer Spending data are derived from the 2018 and 2019 Consumer Expenditure Surveys, Bureau of Labor Statistics. Esri.

Reference: Wetland and Stream Determination Screening Report, Rolesville Small Area Plan, Rolesville Bypass Road, Rolesville, Wake County North Carolina

Dear Mr. Smith:

ECS Southeast, LLP (ECS) is pleased submit this report of the Waters of the US services for the above-referenced site. ECS services were provided in general accordance with ECS Proposal No. 49:25747 authorized on November 11, 2021. **Based on our desktop screening, potentially jurisdictional Waters of the US (WOUS) are present within the Rolesville Small Area Plan Area.**

If there are questions regarding this report, or a need for further information, please contact the undersigned.

1.0 INTRODUCTION

This report presents the findings of a desktop study of wetlands and streams within the Rolesville Small Area Plan Project Study Area conducted by ECS Southeast, LLP (ECS) for O'Brien Atkins Associates at the Rolesville Small Area Plan located in the vicinity of the Rolesville Bypass Road, Rolesville, Wake County, North Carolina (35.901665, -78.486887), and is identified by the Wake County GIS website as Parcel Nos. 1758067247, 1748928776, 1748922028, 1758114564, 1758027535, 1758037335, 1758126725, 1758238570, 1758430100, 1758527755, 1758712719, 1758726794, 1758928330, 1768216907, 1768236815, and 1768328863. The project study area includes sixteen separate sites that collectively make up approximately 1,000 acres-acres, as shown on the Site Location Map (Appendix I, Figure 1). The sixteen sites consist predominantly of undeveloped wooded land and cleared area. The purpose of this study was to preliminarily identify potential jurisdictional Waters of the U.S. (WOUS) within the sixteen sites of the project study area (PSA).

Wetlands are defined by the United States Army Corps of Engineers (USACE) and the United States Environmental Protection Agency (EPA) as "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and under normal circumstances, do support a prevalence of vegetation typically adapted for life in saturated soil conditions." In order for an area to be classified as wetland, hydrophytic vegetation, hydric soils, and wetland hydrology indicators must be present described in the 1987 "Corps of Engineers Wetlands Delineation Manual" and the Appropriate Regional Supplement.

2.0 METHODOLOGY

ECS completed the following tasks to identify and delineate potentially jurisdictional WOUS boundaries onsite:

2.1 Literature Review

ECS wetland scientists reviewed the US Geological Survey (USGS) Topographic Map, US Department of Agriculture Natural Resource Conservation Service (USDA-NRCS) Soil Survey of Wake County, the USDA NRCS 2015 National Hydric Soils List for Wake County, the Federal Emergency Management Agency (FEMA) Floodplain Mapping Service, US Fish & Wildlife Service (USFWS) National Wetlands Inventory (NWI) Wetlands Mapper, NOAA lidar imagery, and available aerial photographs to identify potentially jurisdictional Waters of the US (i.e., streams, wetlands, natural ponds, lakes), and available watershed information.

3.0 FINDINGS

3.1 Literature Review Summary

The following is a summary of the available desktop information that was reviewed as part of this desktop review:

- According to the USGS Topographic Map, Rolesville, North Carolina Quadrangle dated 2019 (Figure 2), the PSA overall ranges from and approximate elevation of 350 feet at the tops of knolls through the PSA to approximately 250 feet along stream corridors through the

PSA. According to the USGS Topographic Map, streams are depicted on PSA Sites 1, 4, 5, 7, 8, 9, 10, 13, 14, and 15.

- The FEMA Flood Insurance Rate Maps (FIRMs), Panels 3720175800J, 3720176800J and 3720176600J, dated May 2, 2006 (Figure 3) indicates the PSA Sites 2 through 16 are located in unshaded Zone X. These areas are determined to be outside the 0.2% Annual Chance Floodplain. Site 1 contains areas subject to the 100 year flood associated with Toms Creek located in the northern portions of the site.
- The US Fish and Wildlife NWI map (Figure 5) does identify wetlands on the PSA within Sites 1, 4, 5, 7, 8, 9, 10, 13, 14 and 15. The NWI classifications include of PFO1A (Palustrine Broad-Leaved Deciduous Temporarily Flooded), PSS1Fb (Palustrine Scrub-Shrub Broad-Leaved Deciduous Semi-permanently Flooded beaver), PUBHh (Palustrine Unconsolidated Bottom Permanently Flooded Diked/Impounded), R4SBC (Riverine Intermittent Streambed Seasonally Flooded) and R5SUBH (Riverine Unknown Perennial Unconsolidated Bottom Permanently Flooded).
- The site is located within the Neuse watershed and is identified as Hydrologic Unit Code (HUC) 03020201.

4.0 REGULATORY DISCUSSION

The WOUS are regulated by Sections 401 and 404 of the Clean Water Act. State and Federal law dictates that any disturbance to WOUS must be permitted through the appropriate agencies.

5.0 WATERSHED CLASSIFICATION/BUFFER REQUIREMENTS

5.1 State Riparian Buffer Requirements

According to the NC DWR, the site occurs in the Neuse River Basin, which is designated as Class C, NSW (nutrient sensitive waters). In addition streams that are mapped on the USGS Topographic Map or the 1970 Wake County Soil Survey Map are subject to State mandated riparian buffers.

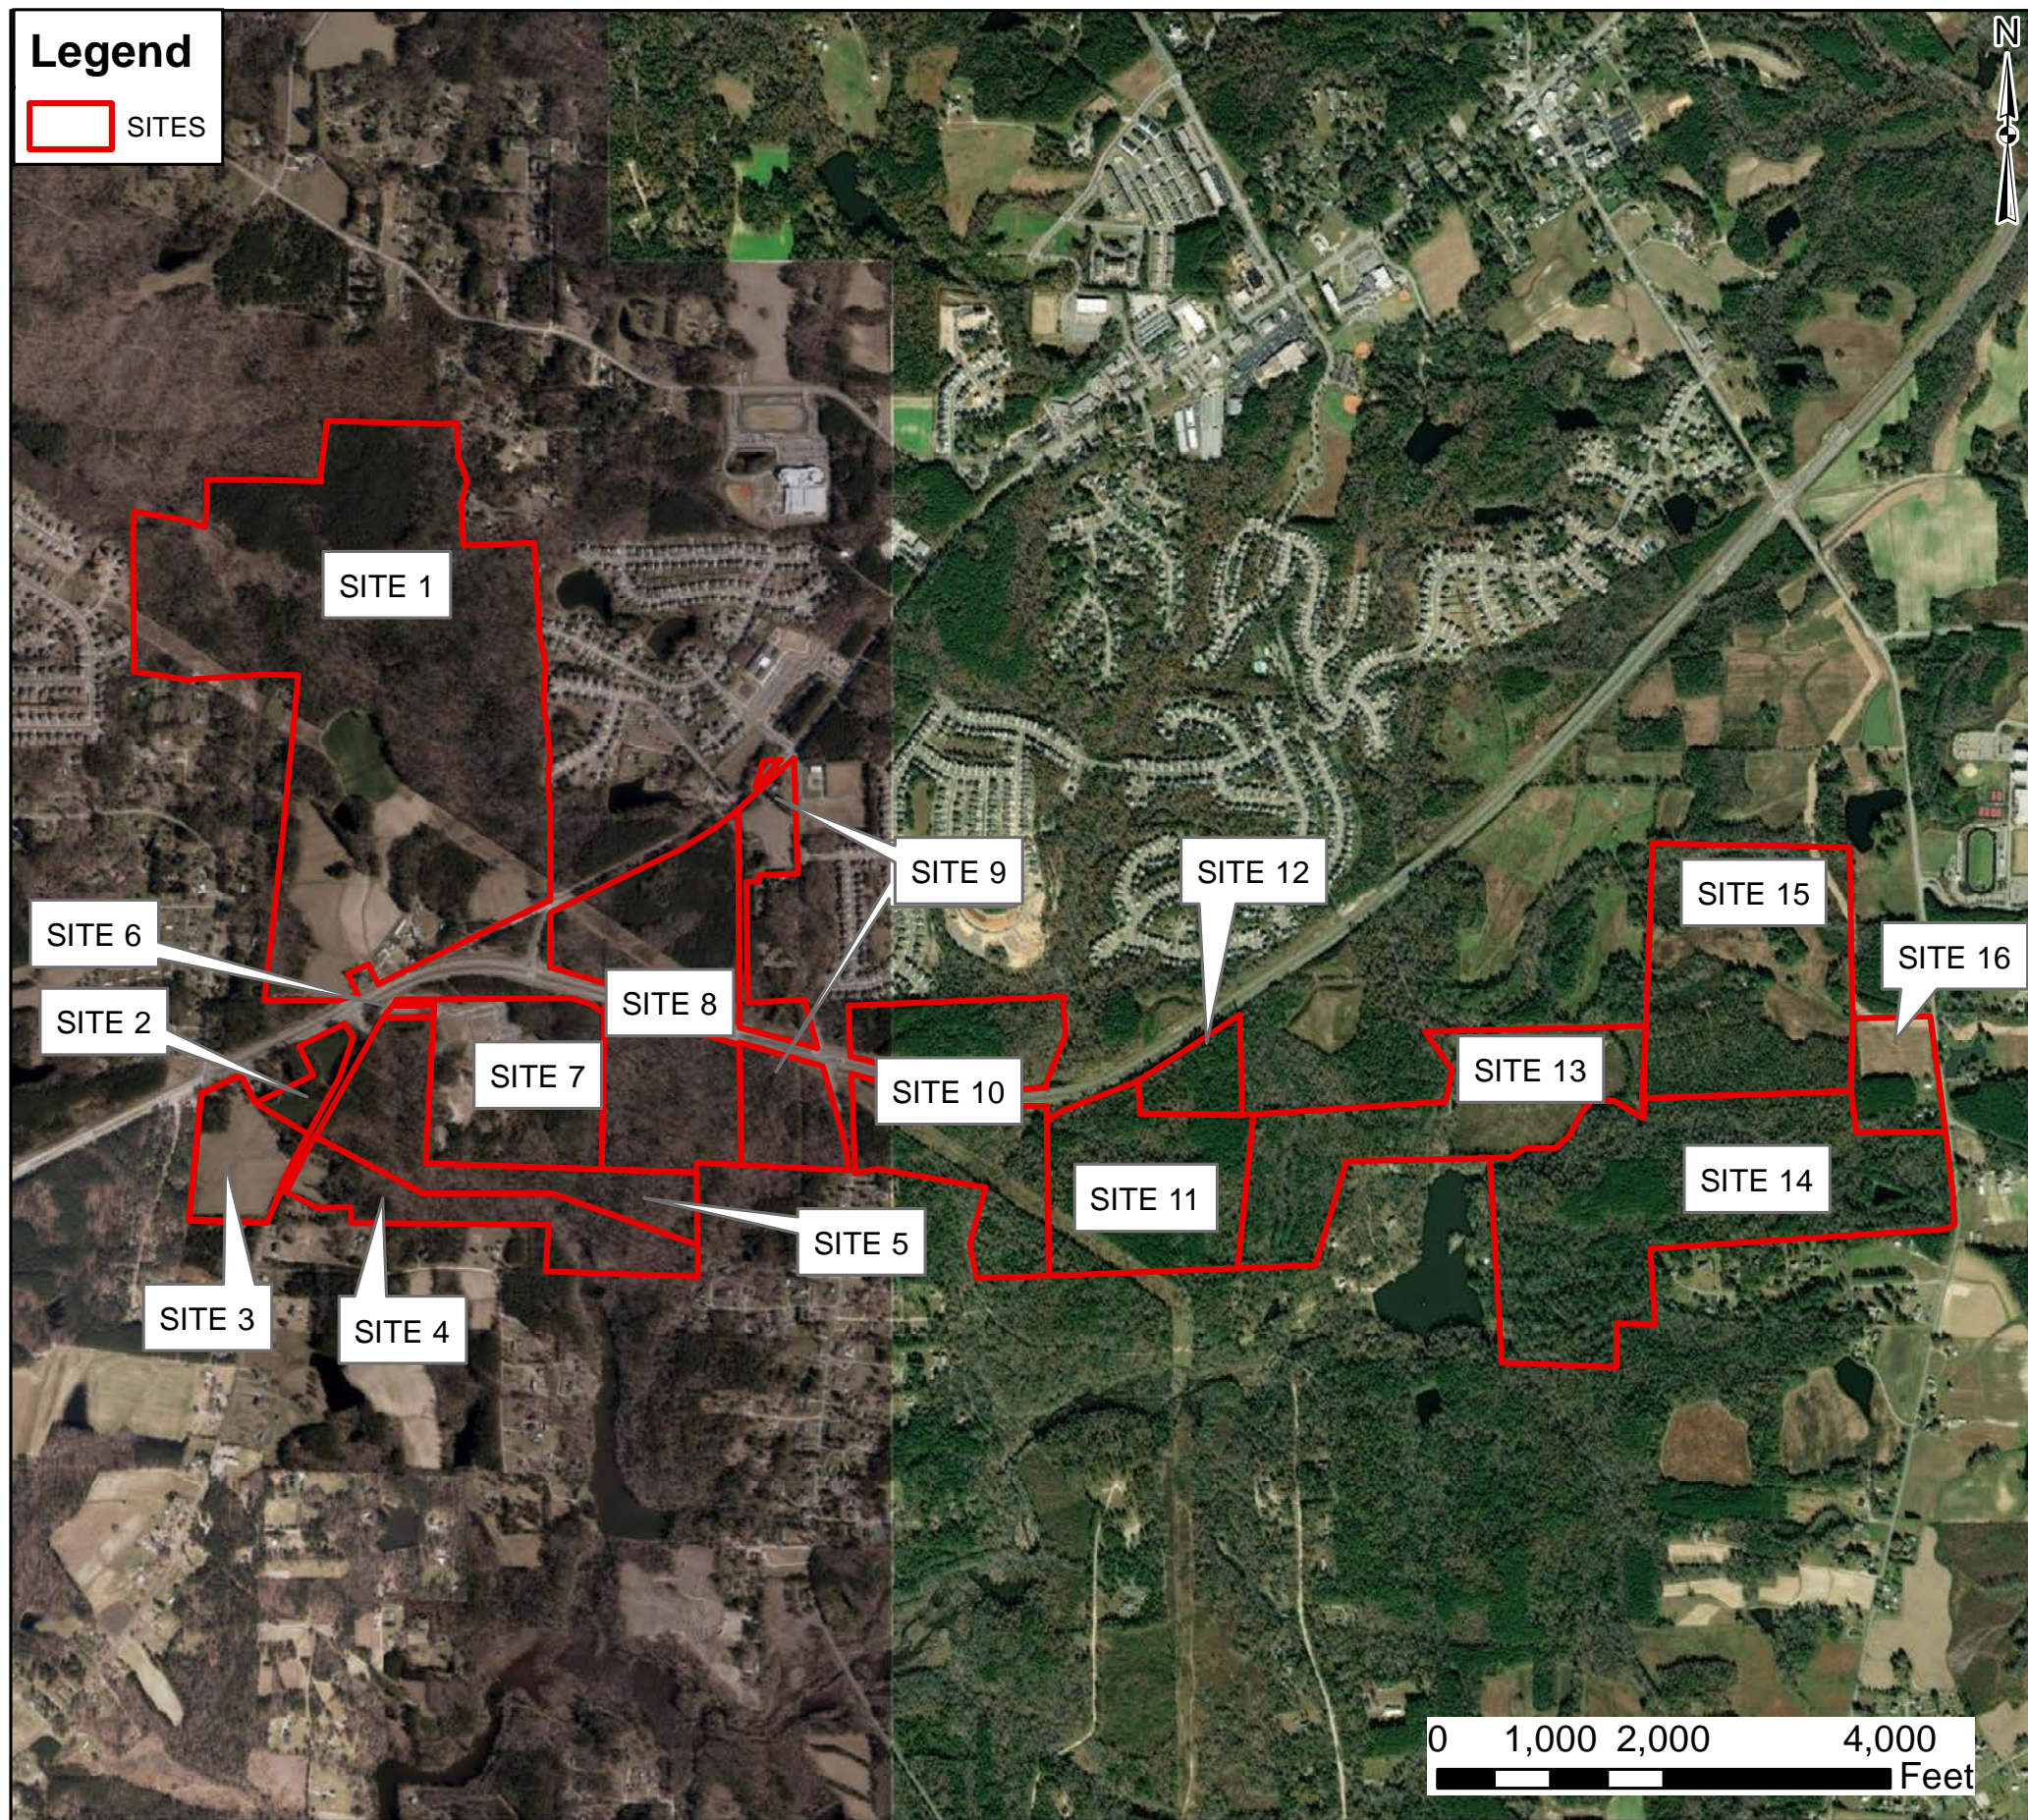

5.2 Local Buffer Requirements

According to the Rolesville Unified Development Ordinance, a 100 foot wide riparian buffer shall be mandated on each side of a stream shown as a blue line on the most recent edition of the USGS 1:24,000 (7.5) minute scale topographic map.

6.0 CONCLUSIONS

According to the ECS screening of the 16 sites with the PSA, Sites 1, 4, 5, 7, 8, 9, 10, 13, 14 and 15 potentially contain jurisdictional wetland areas and/or jurisdictional streams. These conclusions are based upon a screening of available online resources listed within this document and cannot be used for site design purposes. A site reconnaissance and/or detailed delineation of Waters of the US is recommended to define boundaries of jurisdictional Waters for the sites within the PSA.
