Rolesville Fire Department Encourages Use of Key Safes for the Elderly and Individuals with Access and Functional Needs

Firefighters often require rapid entry into homes of the elderly, special needs and hospice residents during a fire or medical emergency; minimizing property damage and avoiding costly repairs caused by their forced entry, is always a concern. A solution that provides firefighters with the access they need is available when vulnerable residents install a fire department approved key safe that provides safe and efficient entry, decreases response times and limits property damage.
