How do I apply for a Building permit? Who should I contact?

The Town of Rolesville partners with the City of Raleigh Utility Department (for water & sewer) and Wake County Permits and Inspections (for Building Code review and Inspections of construction). Permit applications and building plans are reviewed by Wake County for building code compliance; permits are paid for and issued, and inspections are requested through the Wake County Permit Portal.

Applications for irrigation, sewer, and water require an additional permit (issued and paid for) through the **City of Raleigh Public Utilities Permit Portal**.

Questions? Please use the links below.

- Commercial building permits (new or upfit)
- Residential building permit (new or accessory structures)
- Trade permit (commercial or residential)
