ROLESVILLE: Town of Rolesville Land Development Ordinance <u>Appendix B: Flood Damage Prevention and Stormwater</u> Management Section 1.3 Stormwater Management offective lung 1, 2021							
<u>Management, Section 1.2 Stormwater Management</u> effective June 1, 2021. <b>WENDELL</b> : Town of Wendell Unified Development Ordinance (UDO) Chapter 6: Environmental Protection, adopted 7/26/10.							
		bulon, NC Code of Ordina					
☐ 1. <u>Eros</u>	ion Co	ntrol and Stormwater Joir	nt Application (Req	uired to initiate pr	ocessing)		
□ 2. RESI	Review Fees (Required to initiate processing) RESUBMITTALS: The first resubmittal is free, but all subsequent Stormwater resubmissions require a \$150 Resubmission Fee and Erosion Control resubmissions require a \$75 Resubmission Fee.						
3. Not	arized \	Wake County Financial Re	sponsibility/Owner	ship Form (Require	ed to initiate proce	ssing)	

		а.	The application must include the owner's notarized written consent for the applicant to submit an erosion and sedimentation control plan and to conduct the anticipated land-disturbing activity if the applicant is not the owner of the land to be disturbed [10-30-2-(B)-(2)-(c)]	
$\boxtimes$	4.	Other documents:		
	$\boxtimes$	a. Engineering Approval: Copy of approval notification for projects in a municipality's zoning jurisdiction		
		b.	b. 401/404 Documentation (Buffer determination letters, PCN application, comments, and approval) Documentation of wetland delineations.	
		c.	c. NCDOT Approval (Temporary Construction Entrances, Encroachment Agreements)	
		d.	Encroachment agreement(s) completed, signed and notarized for all off-site construction	
$\boxtimes$	5.	Cover letter stating the purpose of the submission, describing site drainage, stormwater management objectives, and how the proposed stormwater management plan will meet the objectives and be implemented RESUBMITTALS: A letter detailing any changes, comments, proposed solutions to review comments, etc.		
	6.	Сору	of the USGS Quad Map with delineated project limits	
	7.	Copy of the Wake County Soil Survey map with delineated project limits from 1970 manuscript		
	8.	One (1) electronic copy of a complete set of construction drawings for 1st resubmission, number (#) copies for final approval.		
	9.	One (1) electronic copy of the Municipal Stormwater Design Tool ( <u>click here</u> ); submit Excel workbook (Site Data Sheet, Drainage Area Sheets, Site Summary Sheet, BMP Sheets, and BMP Summary sheet)		
$\boxtimes$	10.	Drainage Area Maps with stormwater discharge points and Tc flow paths (existing/post construction/post BMP) -Please provide DA maps for post construction and explain how stormwater is conveyed to SCM.		
$\boxtimes$	11.	Drainage Area Map showing drainage areas to erosion control devices (can delineate on plan sheets)  -Please remove references to drawings that are not associated with this permit.  -Provide legend for C1.0, C1.1. DAs do not match topography.		
	12.	Stormwater and Erosion Control Calculations:		
		a.	Sediment basin design (See website for Wake County Design Criteria)	
		b.	Ditches, swales, and channels: Q10/V10. Tractive force (shear stress), capacity and geometry	
		c.	Dissipaters: Q10 velocities, stone size and dimensions	
		d.	Velocity calculations for stormwater runoff at points of discharge resulting from a 10-year storm after development were not provided or do not comply	
		e.	Support data for all stormwater practice designs, such as inflow/outflow rates, stage/storage data, hydrographs, outlet designs, infiltration rates, water elevations, design output, summary, etc.  -Final plat with impervious limit for each lot should be recorded.	
		f.	Other hydraulic and hydrologic computations critical to the plan/designs	
		g.	Signature, Date and Professional Seal: for all Stormwater design management proposals, i.e., calculations, BMP designs, operations/maintenance/budget/as built/inspections/manuals	

	13.	Draft Stormwater Agreement and draft Maintenance Agreement		
$\boxtimes$	14.	Proposed Site Plan:		
		a.	a. Combined Erosion Control, Stormwater and Floodplain Approval Block (Cover Sheet)  -Please complete permit numbers in signature block	
		b.	Location/Vicinity Map	
		c.	North arrow, graphic scale, drafting version date, legend and professional seal	
		d.	Existing and proposed contours: plan and profiles for roadways	
		e. Boundaries of tract: including project limits		
		Table with impervious calculations - existing and proposed impervious surfaces: roads, well lots, recreation sites, single family residences, etc. (consistent with the Municipal Stormwater Design Tool inputs)		
		g. Proposed improvements: roads, buildings, parking areas, grassed, landscaped and natural areas		
		h.	Lot lines, lot numbers, road names, and impervious limit on each lot rounded to nearest sq ft.	
		i.	Utilities: community water and sewer, plan/profiles, easements and sediment controls	
	$\boxtimes$	j.	Stormwater Network: inlets, culverts, swales, ditches, channels and drainage easements -Stormwater network to SCM must be installed prior to approval.	
	$\boxtimes$	k.	TEMPORARY SEDIMENT CONTROLS: locations and dimensions of gravel entrances, diversion ditches, silt fence, sediment basins, inlet protection, etc.  -All erosion control measures must be withing LOD.  -Please revise silt fence configuration at construction entrance Phase 1 so that sediment does not go off property.  -Limits of disturbance is listed as 1.33 ac on the plans and 1.31 elsewhere. Please revise.  -Why are pipes greyed out in C1.1? Please revise and include pipe installation in construction sequence.	
		I.	Sediment Basin Dewatering Bags: Provide a dewatering bag and location pad adjacent to all sediment basins for maintenance and closeout. Label the bag and pad with dimensions.	
		m.	Stream Culvert Construction Phasing: Provide a detailed construction sequence for installation of culverts at streams and show the stream crossing(s) on the erosion control plan sheets. Include all applicable details related to managing the stream flow during the culvert installation (silt bags, pump around, impervious dikes, etc.).	
		n.	Stream Protection: Design temporary sediment storage during the construction phase of stream culvert installation on all four-corners of the stream crossing (where applicable) and show on the erosion control plan sheets. Provide erosion control blankets on all permanent slopes of culvert at stream crossing.	
		o. PERMANENT EROSION CONTROLS: locations and dimensions of dissipaters, ditch linings, armoring, level spreaders, retaining walls, etc.		
		p.	DETAILED COMMENTS REGARDING PERMANENT SEDIMENT CONTROLS:	
		q.	Location and requirements for stockpiles (see website for Stockpile Requirements)	

		r.	Wake County Construction Sequence (Provide project specific details as needed)		
		s.	Wake County Construction Details		
		t.	Wake County Stabilization Guidelines		
		u.	Wake County Basin Removal Sequence Wake County must grant permission to convert the sediment basin over to stormwater use prior to completing any related work (construction sequence or note elsewhere on the plan should indicate this).		
		v.	Show all Riparian Buffers (Neuse: [15A NCAC 2B .0714])		
		w.	Delineation of current FEMA boundaries (floodway, non-encroachment areas, flood fringe and future/0.2%)		
		х.	PERMANENT STORMWATER MANAGEMENT STRUCTURES: locations and types of all proposed stormwater management structures (grass swale, wet/dry detention basin, filtering/infiltration basin, bioretention, etc.) -Please confirm that 30-inch RCP under US 401 and stormwater network to SCM has been installed.		
	$\boxtimes$	DETAILED COMMENTS REGARDING PERMANENT STORMWATER MANAGEMENT:  y.  Cold and stormwater network to solve his been installed.			
		у.	-SCM must be in place prior to approval of stormwater discharge.		
		z.	Proposed stormwater easements, access lanes and backwater easements. Provide and label minimum 20 ft. Access easement and 10 ft. Maintenance easement from toe of stormwater pond embankment.		
Stan	dards	and Re	equirements		
com	<mark>ments</mark>	and/o	th an "X" note relevant standards to be applied to the proposed development. Notes in RED provide review rany required elements to comply with standard.  nces are shown in brackets.		
Orui	Harice		nwater Review Required – All residential subdivision development must submit a plan to comply with the		
$\boxtimes$	15.	applicable municipalities' stormwater ordinance. Office, institutional, commercial or industrial development that <u>disturbs</u> greater than 20,000 square feet is required to comply with the stormwater management regulations. Development and redevelopment that disturb less than 20,000 square feet are not exempt if such activities are part of a larger common plan of development or sale, even though multiple, separate or distinct activities take place at different times on different schedules.  Rolesville [1.2.1.(E)], Wendell [6.5(F)], Zebulon [151.05]			
$\boxtimes$	16.	Stormwater Permit – is required for all development and redevelopment unless exempt pursuant to the Code of Ordinances. A permit may only be issued subsequent to a properly submitted, reviewed and approved stormwater management plan and permit application.  Rolesville [1.2.3.(B)(2)], Wendell [6.5(F)(3)], Zebulon [151.21(A)]  Note: A permit may not be required if there are no post-construction requirements (i.e. SCMs).			
$\boxtimes$	17.	SCMs – For projects requiring stormwater treatment for quality and/or quantity control, the applicant must  1) comply with the NC Stormwater Design Manual Rolesville [1 2 4 (B)(2)] Wendell [6 5(N)(2)] Zebulon [151 07]			
$\boxtimes$	18.	Standards Based on Project Density – In accordance with the definitions, projects are identified as Ultra Low-Density (15% or less Built-Upon Area, referred to as BUA, and less than one dwelling unit per acre), Low-Density (more than 15% BUA and no more than 24% BUA), and High-Density (24% or more BUA).  Rolesville [7.5.4], Wendell [6.5(E)], Zebulon [151.10]			

		Standards for Ultra-Low and Low-Density Projects:		
		Use of vegetated conveyances to maximum extent practicable		
l		Location of development and redevelopment outside Riparian Buffer and Flood Protection Zones		
l		·		
		Recorded deed restrictions or protective covenants to ensure future development maintains		
		consistency with approved project plans		
		Permanent SCMs (Stormwater Control Measures) are to be designed in accordance with and as		
		specified in the North Carolina Department of Environmental Quality's Design Manual.		
	П	<ul> <li>For Low-Density only, no net increase in peak flow leaving the site from the pre- development</li> </ul>		
		conditions for the 1 yr-24hr storm. Runoff volume drawdown time shall be a minimum of 48 hours, but		
		not more than 120 hours.		
		<ul> <li>Residential runoff after development must not exceed the Target Curve Numbers listed in the chart</li> </ul>		
		"Maximum Composite Curve Number, by Soil Group".		
		<ul> <li>Ultra-Low and Low-Density projects may be eligible for target curve number credits.</li> </ul>		
		Wendell Only: Nitrogen export limited to 3.6 pounds per acre per year unless project achieves classification as		
		an LID Project.		
		Rolesville [1.2.4(A)(1-3)], Wendell [6.5(M)(1)], Zebulon [151.35(A-C)]		
		Standards for High-Density Projects:		
		Measures shall control and treat runoff from the first inch of rain. Runoff volume drawdown time shall		
		be a minimum of 48 hours, but not more than 120 hours.		
		Structural measures shall be designed to have a minimum of 85 % average annual removal for Total		
		Suspended Solids (TSS)		
	$\boxtimes$	Permanent SCMs (Stormwater Control Measures) are to be designed in accordance with and as		
		specified in the North Carolina Department of Environmental Quality's Design Manual.		
		No net increase in peak flow leaving the site from the pre -development conditions for the 1 yr-24hr		
		storm. Runoff volume drawdown time shall be a minimum of 48 hours, but not more than 120 hours.		
		Location of development and redevelopment outside Riparian Buffer and Flood Protection Zones		
		Rolesville [1.2.4(A)(4)], Wendell [6.5(M)(4)], Zebulon [151.35(D)]		
		Low Impact Development (LID) Classification:		
		All development or redevelopment may be submitted for LID classification		
		Development must mimic the pre-developed hydrologic conditions of the site, as defined as "woods in		
		good condition" for the 2-yr, 24 hr storm, within 10%.		
		Techniques required to achieve LID classification		
	П	Natural site design		
		<ul> <li>Bio-retention systems or on-site infiltration (at least one must be used)</li> </ul>		
		At least <b>two</b> other techniques from the list provided in Rolesville [1.2.4.(B)(5)(e)], and <b>Zebulon</b>		
		[151.36(E)(5)]		
		At least <b>one</b> other technique from the list provided in <b>Wendell</b> [6.5(N)(5)(e)]		
ĺ		to to the control of		
		Downstream Impact Analysis – Required analysis using the "10% rule" drainage area evaluation of the 10-year,		
$\boxtimes$	19.	24-hour peak flow of the pre/post development to determine if the project will have any impacts on flooding or		
		channel degradation downstream of the project site in accordance with Rolesville [1.2.4.(B)(1)] Wendell		
		[6.5(N)(1)], <b>Zebulon</b> [151.36(A)].		
Wal	ke Cou	nty UDO Article 10 - Erosion and Sedimentation Control Requirements		
		Rolesville, Wendell and Zebulon)		
(,,,)		The state of the s		

	Erosion Control: This project will require a Land Disturbance Permit if it involves greater than one acre of					
$\boxtimes$	20.	<u>distu</u> ı	disturbance. <b>Note</b> : If the land disturbance is part of a common plan of development that is greater than one			
			acre of disturbance, an Approved Erosion and Sediment Control Plan and Land Disturbance Permit are required			
			ach individual tract or parcel disturbance within the common plan of development, regardless of land			
			rbance acreage in each tract/parcel.			
			num Standards [Article 10-20-1] — All soil erosion and sedimentation control plans and measures must			
$\boxtimes$	21.		conform to the minimum applicable standards specified in North Carolina's Erosion and Sediment Control			
			Planning and Design Manual. Erosion control devices must be installed to prevent any offsite sedimentation for			
			onstruction site regardless of the size of the land disturbance.			
		-	Operation in Lakes or Natural Watercourses [Article 10-20-3] – Land disturbing activity in connection with			
	22.		construction in, on, over, or under a lake of natural watercourse must minimize the extent and duration of			
			disruption of the stream channel. Where relocation of a stream forms an essential part of the proposed activity,			
			elocation must minimize unnecessary changes in the stream flow characteristics.  Hards for High Quality Water (HQW) Zones [Article 10-20-11]			
	23.		disturbing activities to be conducted in High Quality Water Zones must be designed as follows:			
		Larra	Uncovered areas in High Quality Water (HQW) zones must be limited at any time to a maximum total			
	Ш	a.	area of 20 acres within the boundaries of the tract.			
			Maximum Peak Rate of Runoff – Erosion and sedimentation control measures, structures, and devices			
		b.	within HQW zones must be planned, designed and constructed to provide protection from the runoff of			
			the 25-year storm.			
			<b>Settling Efficiency</b> – Sediment basins within HQW zones must be designed and constructed so that the			
		c.	basin will have a settling efficiency of at least 70% for the 40 micron (0.04mm) size soil particle			
		-	transported into the basin by the runoff of that 2-year storm which produces the maximum peak rate of			
			runoff.			
			Grade – The angle for side slopes must be sufficient to restrain accelerated erosion (side slopes no			
		d.	steeper than two (2) horizontal to one (1) vertical if a vegetative cover is used for stabilization unless soil conditions permit a steeper slope or where the slopes are stabilized by using mechanical devices,			
			structural devices or other acceptable ditch liners)			
			structural devices of other acceptable after intersy			
Neu	ıse Rip	arian E	Buffer Rules			
		Duo	to the location of this project, it should be noted that a rule to protect and maintain existing buffers along			
			ercourses in the Neuse River Basin became effective on July 22, 1997. The <b>Neuse River Riparian Area</b>			
		Protection and Maintenance Rule (15A NCAC 2B .0714) applies to all perennial and intermittent streams,				
	25.		lakes, ponds and estuaries in the Neuse River Basin with forest vegetation on the adjacent land or "riparian			
		area".				
Nor	th Card	olina G	eneral Statute § 113A-61 (c) - Right to Appeal the Decision			
$\boxtimes$	26.	The applicant has the right to appeal this decision per North Carolina General Statute § 113A-61 (c).				
Add	itional	Sugge	sted Changes/Comments
