Nicholas,

I can potentially find as-builts for the waterline below. There is a development that has approved plans to bring water to the Watkins Rd intersection but we do not have as-builts for that yet. This would be the only as-built info we have for water. Is this what you are looking for?

Good morning sir, hope you're doing well. We spoke some time ago about potential tie in information in the area of Mitchell Mill Rd where we are developing. I greatly appreciate the help that you and Mr. Fowler provided with tie in

details. I have been trying to reach out to Mr. Fowler about some further details, but have not gotten a response. Could you please help us with getting asbuilt details of the existing tie in for water on Louisburg Rd, as well as any accepted plans for the anticipated extension of the line up to Watkins Rd. If you had time to help us that would be greatly appreciated sir. Thank you so much for your time.
