Containment Assembly: A backflow assembly, installed at the point of separation between the public water supply and a private service or private distribution system or at the point of metering.

Minimum requirements: Containment assemblies must be installed within 50' linear feet of piping from the most downstream edge of the meter box or ROW and be on the ASSE and USC approval list. Please see Appendix A: Guidelines and Requirements for the Cross Connection Program for further installation guidelines.

Water Service (Domestic, Irrigation, Fire, or Private Distribution System)	Type of Backflow: Reduced Pressure Zone (RPZ), Reduced Pressure Detector Assembly (RPDA), Double Check (DC), or Double Check Detector Assembly (DCDA)	Model of Containment Backflow	Size of Service	**Office Use Only** Approval of Location, Type, and Model
Domestic	DC	Ames Model 2000B (or Similar)	1.5 inch	
Fire	RPZ	Ames Model 2000-DCA (or Similar)	6 inch	

Professional Engineer

I understand that all containment backflow assemblies must be installed in accordance with Raleigh City Code: Article D: Water Quality Protection and Appendix A: Guidelines and Requirements of the Cross-Connection Program. Any changes made to the type of containment backflow or location must be resubmitted to the City of Raleigh's Cross Connection Program for approval.
